# Aesis™

«SONIC»

Powered by the next generation in sonic seaming, the Hodgman® Aesis™ Sonic wader utilizes Sonic 2.0 fabric welding technology. The Aesis Sonic is maximized for durability with puncture resistant 5-layer shell fabric on the lower wader and 4-layer on the upper to enhance breathability. Functional features from top to bottom along with Core INS removable insulation system compatibility, creates the most versatile wading system available.

## 4 LAYER

Highly breathable upper construction where maximum sweat vapor transfer is needed. DWR (Durable Water Repellent) external coating provides long lasting performance.

Large capacity welded chest pocket with YKK® water resistant zipper

Suspender system converts waders from chest to waist high without removing suspenders

## SONIC

The next generation of sonic seam technology utilizes a double sonic weld for added waterproof seam performance without the use of thousands of stitch holes. All seams utilize waterproof seam tape for extra leak protection.

## 5 LAYER

The durable puncture resistant 5-Layer shell fabric on the leg and seat ensures water stays on the outside of your wader — where it belongs.

# WADERS - ACCESSORIES

## Aesis Series

Powered by the next generation of sonic seaming technology, the Hodgman® Aesis Sonic wader utilizes Sonic 2.0 technology to create double sonic weld seams, which eliminate thousands of stitch holes. Each seam is reinforced with waterproof seam tape for the ultimate leak protection, ensuring water stays on the outside of your wader where it belongs.

We know you'll be in and out of drift boats or climbing river edges on your mission to catch fish, so we utilize 5-layer construction on the leg and seat for exceptional puncture resistance. Additionally, we eliminated inside leg seams in high abrasion areas while still allowing articulation in the knees for stellar range of motion and mobility.

The upper wader incorporates 4-layer shell fabric for added breathability where you need it most, and features a Durable Water Repellent (DWR) coating to shed water from your wader.

Convert your wader to waist high without removing your suspenders via the drop down system for hot days. A large capacity YKK® zip chest pocket is perfect for storage, plus an outer mesh tippet pocket and internal flip out storage pocket are included.

Comfort is key for long days wade fishing so we use anatomically correct left and right booties with the Hodgman print design for a custom fit. Each stocking foot bootie utilizes 5mm thick neoprene to keep your feet warmer in cold water.

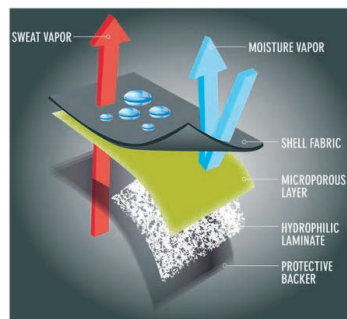

This wader also accepts the Core INS removable zoned insulation system so you can transform your wader for cold or warm weather wading (sold separately). The liner zips in to create the one and only all-season wader available today.

## Aesis Sonic Digi Stocking Foot

- Durable puncture resistant 5-Layer seat and legs with no inside leg seam eliminating leak points from abrasion points
- Breathable 4-Layer upper for moisture vapor transfer
- Sonic 2.0 seams
- Top loading external pocket with water resistant zipper
- Suspender system converts waders from chest to waist high without removing suspenders
- Anatomically correct left and right neoprene booties
- Flip out internal zippered storage pocket
- Stretch wade belt with low profile DuraFlex® buckle and belt loops
- D-Ring on back for net
- Core INS removable insulation system compatible

**H HODGMAN**

Durability and breathability come together to form the Hodgman® H5 stocking foot wader. Whether you are scrambling up rocky, brush covered banks or climbing in and out of drift boats, the 5-layer construction in the leg and seat ensure water stays on the outside of your wader where it belongs. The H5 is compatible with the Core INS™ removable insulation system.

# 3 LAYER

Highly breathable upper construction where maximum sweat vapor transfer is needed. DWR (Durable Water Repellant) external coating provides long lasting performance.

Top loading external pocket with water resistant zipper

Micro-fleece lined hand warmer with water resistant zippers

# 5 LAYER

The durable puncture resistant 5-Layer shell fabric on the leg and seat ensures water stays on the outside of your wader - where it belongs.

**NEW**

## H5 Stocking Foot

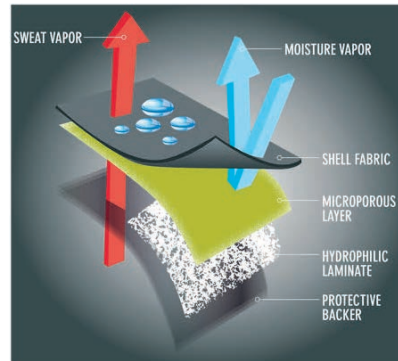

Durability and breathability come together to form the Hodgman® H5 stocking foot wader. We know you'll be scrambling up rocky, brush covered banks, or climbing in and out of drift boats, so we utilize 5- layer construction on the leg and seat for exceptional puncture resistance. Additionally, we eliminated inside leg seams in high abrasion areas while still allowing articulation in the knees for stellar range of motion and mobility.

The upper wader incorporates 3- layer shell fabric for added breathability where you need it most, and features a Durable Water Repellent (DWR) coating to shed water from your wader. Microfleece- lined handwarmer pockets utilize YKK® water- resistant zippers, and a large capacity YKK® zip chest pocket is perfect for storage.

This wader also accepts the Core INS removable zoned insulation system so you can transform your wader for cold or warm weather wading (sold separately). The liner zips and snaps in place to create the one and only all-season wader available.

Comfort is key for long days wade fishing, so we use anatomically correct left and right booties with the Hodgman print design for a custom fit. Each stocking foot bootie utilizes 5mm thick neoprene to keep your feet warmer in cold water. Additionally our Comfort Fit Gravel Guard design eliminates a bulky and uncomfortable connection point at the top of the booties.

- Durable puncture resistant 5-Layer seat and legs with no inside leg seam eliminating leak points from abrasion points
- Breathable 3-Layer upper for moisture vapor transfer
- Stitched and taped waterproof seams
- Top loading external pocket with water resistant zipper
- Micro- fleece lined hand warmer with water resistant zippers
- Y-Back elastic suspenders with low profile DuraFlex® buckles
- Anatomically correct left and right neoprene booties
- Flip out internal zippered storage pocket
- Comfort Fit gravel guard design eliminates pressure points above ankle
- Wade belt with low profile DuraFlex® buckle and belt loops

## Core Ins Wader Liner

NEW

Convert your Hodgman® wader using the one and only all-season wader insulating system. The removable Core INS system utilizes zoned insulation in your lower body where you need it most. We utilize Thinsulate® insulation in the leg and hip which are submerged most often so the frigid bite from cold water doesn't reach your legs. Additionally, if you work up a sweat getting to your fishing spot the moisture resistant breathable insulation keeps you warm even when moist. A fleece upper ensures comfort where you need less insulation above the water.

- Core INS removable multi-zone breathable wader insulation system for added warmth in the legs and seat that are most often submerged
- Thinsulate® moisture resistant insulation provides more warmth than other insulations even when damp from sweat vapor
- Easy on and off design allow user to slip in and out of wader easily and eliminates binding in knees
- Warm fleece upper
- Easily zips and snaps in minutes into any Hodgman wader that accepts Core INS System

## Lumbar Belt

Wading safely is always the right choice. Now you can fish with a little extra support thanks to the Hodgman Lumbar Wading Belt. The sculpted design is uniquely patterned to increase airflow through the belt while enhancing support for your lower back. A dual adjustment system allows the belt to fit a wide range of builds with adjustable sizing from 30" to 52". Adding versatility, integrated into the rear of the belt is a net holder or accessory attachment point. Next time you are wading, step up your support with this lumbar support belt and wade in comfort.

- Lumbar support reduces fatigue
- Molded design increases airflow

# LOCK™

LOCKING INTERCHANGEABLE SOLE

Wade with confidence using the most advanced wading boot system available. The Hodgman® H-Lock removable sole system allows you to swap soles for ideal traction control in any terrain or aquatic environment.

### DUAL LOCKING – EXTRA SECURE

The dual lock system holds the sole securely in place. Once engaged, the sole will not come off unless both the front and rear locks are disengaged simultaneously — rendering all other removable sole systems obsolete.

**TWIST-TO-LOCK**

### INTERNAL DRAINAGE SYSTEM

- Internal drainage channels allow excess water weight to drain out of the boot
- Each step you take flushes the system of sand, gravel, and debris

## Vion H-Lock Wade Boot Series

Wade with confidence using the most advanced wading boot system available. The Hodgman H-Lock removable sole system allows you to swap soles for ideal traction control in any terrain or aquatic environment. The dual lock system holds the sole securely in place. Once engaged the sole will not come off unless both the front and rear locks are disengaged simultaneously rendering all other removable sole systems obsolete. The Vion upper incorporates waterproof nubuck leather construction for exceptional durability and the inner boot is lined with neoprene for added warmth as well as a reduction in water retention. No one wants to haul water around with them, so each step you take drains water from the bottom of the shoe and cleans the track system free of debris. This boot is saltwater ready with corrosion resistant hardware, and the 3D-molded toe guard adds protection where you need it most. The Vion utilizes double-stitched panel construction for long term durability required by guides who spend countless days on the water, and a D-ring on the tongue ensures a secure location for gravel guard hooks to attach to.

## Aesis H-Lock Wade Boot Series

Wade with confidence using the most advanced wading boot system available. The Hodgman H-Lock removable sole system allows you to swap soles for ideal traction control in any terrain or aquatic environment. The dual lock system holds the sole securely in place. Once engaged the sole will not come off unless both the front and rear locks are disengaged simultaneously rendering all other removable sole systems obsolete. The Aesis utilizes the BOA® M2 closure system for quick adjustment on demand. These boots are constructed from abrasion-resistant synthetic material, and for added durability sheet rubber protects high wear areas. No one wants to haul water around with them, so each step you take drains water from the bottom of the shoe and cleans the track system free of debris. This boot is saltwater ready with corrosion resistant hardware and the D-ring on the tongue ensures a secure location for gravel guard hooks to attach to. The Aesis utilizes double and triple-stitched panel construction for long term durability required by anglers who spend many days on the water each year.

## H5 H-Lock Series

Wade with confidence using the most advanced wading boot system available. The Hodgman H-Lock removable sole system allows you to swap soles for ideal traction control in any terrain or aquatic environment. The dual lock system holds the sole securely in place. Once engaged the sole will not come off unless both the front and rear locks are disengaged simultaneously rendering all other removable sole systems obsolete. The H5 boot is constructed from abrasion resistant synthetic material, and for added durability sheet rubber protects high wear areas. No one wants to haul water around with them, so each step you take drains water from the bottom of the shoe and cleans the track system free of debris. This boot is saltwater ready with corrosion resistant hardware and the D-ring on the tongue ensures a secure location for gravel guard hooks to attach to. The H5 utilizes double and triple-stitched panel construction for long term durability required by anglers who spend many days on the water each year.

### H5 H-Lock Wade Boot (Wadetek / Felt)

**NEW**

- H-Lock interchangeable sole system for optimum traction and secure lock
- Integrated drainage ports in H-Lock system remove excess water weight quickly
- Abrasion resistant synthetic upper construction
- Corrosion-resistant hardware
- Reinforced rubber toe for added protection
- D-ring gravel guard attachment point
- Lightweight shock absorbing EVA mid sole
- Easy on/off heel webbing serves as shoe horn

## Hodgman H-Lock Sole (felt)

Selecting the optimum sole for various river and surf conditions can spell the difference between a great day in the water versus wading while not knowing what the next step might bring. Wade with confidence because the Hodgman H-Lock interchangeable sole system is designed to allow anglers to adapt to any condition. To remove soles simply lift the tab located on the front inside edge of the sole and depress the button located at the rear of the shoe. Then twist the sole off of the shoe. It's that simple.

Other removable sole systems can work themselves free over time, flap open in sticky mud or have attachment straps that can break. The H-Lock interchangeable sole system locks into place until you decide that it's time to change your sole and ensures a secure fit.

Now you can buy one pair of shoes for various wading conditions. Utilize a studded sole one day for added grip in treacherous terrains, then switch to a non-studded sole the next when drift boating your favorite river. Additionally trading out felt soles between rivers or switching to another sole type can help stop the spread of invasive species.

- Compatible with Hodgman H-Lock removable sole boots
- Interchangeable sole system for versatility in any condition
- Switch out your soles in different rivers to prevent the spread of invasive species
- Felt outsole for slippery aquatic environments

## SHELL JACKET

Forget the weather and focus on the fishing with the Hodgman® Aesis shell jacket thanks to its 3-layer waterproof and windproof V-Tech™ breathable fabric. We designed the Aesis with a double water shedding rain fly on the front zipper, and fully taped seams so even in the worst torrential downpour mother nature can throw your way, you'll be sure to stay dry.

3-way adjustable integrated wire brimmed hood

Double water shedding rain fly prevents water from entering front zip

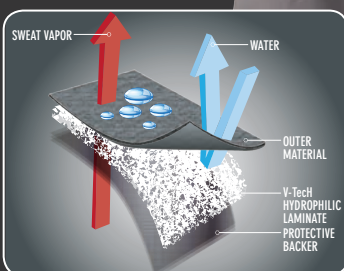

Two large front pockets with accessory attachment points and magnetic patch for quick fly storage

3-Layer waterproof/windproof V-Tech™ breathable fabric with warm micro-fleece lining and fully taped seams

Storm watertight cinch cuffs

# CLOTHING

## Aesis Shell Jacket

**NEW**

Forget the weather, focus on the fishing with the Hodgman® Aesis Shell Jacket thanks to its 3-layer waterproof and windproof V-Tech breathable fabric. We designed the Aesis Shell Jacket with a double water-shedding rain fly on the front zipper and fully taped seams, so even in the worst torrential downpour Mother Nature can throw your way you'll be sure to stay dry.

The integrated wire brim hood incorporates a 3-way adjustment to seal out rain from entering where the jacket meets your face and maintains your peripheral vision. Water tight cinch cuffs also eliminate water from running down your sleeve when casting or while releasing a fish.

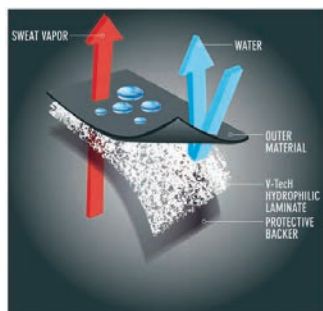

We know you want to focus on catching your next fish so our ROM (Range of Motion) fit incorporates a gusset under the arm and articulated sleeves to eliminate binding along your shoulders when casting.

Large low profile chest pockets are perfect for storing fly boxes or gear, and numerous interior and exterior pockets are designed to customize the way you use the jacket. A removable magnetic patch on the chest is perfect for quick fly or hook storage when changing out presentations for your next cast. Both front and rear D-rings allow for accessory attachment.

We even took the time to think about how you put on the jacket under waders since we know what a pain it can be to stuff your jacket down when its pushed up to your neck. The specialized belt catch loops keep the jacket in place while pulling up your waders.

- 3-Layer waterproof/windproof V-Tech breathable fabric and fully taped seams
- 3-way adjustable integrated wire brimmed hood
- Two large front pockets with accessory attachment points and magnetic patch for quick fly storage
- ROM articulated fit and design for optimum range of motion
- Two YKK® vertical water repellent zip chest pockets
- Storm watertight cinch cuffs
- Back D ring for accessory attachment
- Two lower YKK® zip hand pockets
- Inner security pocket

## Aesis Sonic Wadelite Jacket

You never know when you'll get stuck in Mother Nature's next downpour, but you'll know you are prepared for it with the Hodgman® Aesis Sonic WadeLite® shell jacket. Designed with lightweight inspiration, we utilize our breathable V-Tech lightweight ripstop fabric for the perfect blend of durability and airy weight.

This jacket utilizes Sonic 2.0 technology, which creates a double sonic weld seam and eliminates thousands of stitch holes in the fabric, ensuring water stays on the outside of your jacket where it belongs. The vented design and laser cut underarm perforations enhance breathability, while the fully taped seams seal out rain.

Striking the perfect balance of form and function, watertight cinch cuffs prevent water from running up your sleeve when releasing or landing a fish. Approach your next day on the water with confidence and go further in the Aesis Sonic WadeLite® jacket. After all, you've got gear designed with grit.

- 3-Layer waterproof/windproof V-Tech WadeLite® ripstop breathable fabric and fully taped seams
- Sonic 2.0 seams
- Perforated laser cut arm vents
- Two lower YKK® zip hand pockets
- Vertical water repellent YKK® zip chest pocket
- Watertight cinch cuffs

- Hidden nylon D-rings on front chest for accessory attachment
- Two YKK® vertical water repellant zip chest pockets
- Storm watertight cinch cuffs
- Back D-ring for accessory attachment
- Inner security pocket

### INNER SHELL

- Removable inner insulated systems jacket
- Two lower YKK® zip hand pockets
- Vertical zippered chest pocket for storage
- High water hand warmer pockets located on chest
- Belt catch loop keeps jacket in place while putting on wader
- Inner security pocket

**NEW**

## Aesis 3 IN 1 Jacket

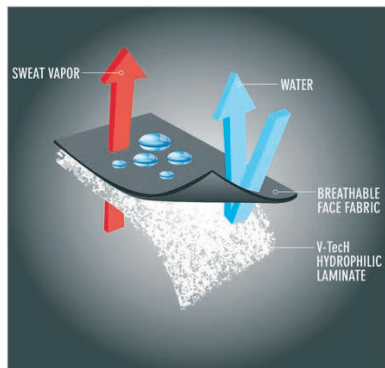

"True anglers know fall and winter fishing can be the most rewarding seasons of the year to target fish, if you can stand the cold conditions. The Aesis 3-in-1 Jacket combines an outer shell jacket and an inner insulating jacket to provide the versatility you need to spend long days pursuing your passion year round.

Forming the outer barrier, a V-Tech™ breathable shell jacket features fully taped seams with a triple water shedding rain-fly, which seals out water even in the most aggressive downpours. Not to mention the removable and stowable brimmed hood allows you to retain your full field of vision when in use thanks to its three-way adjustment. Additionally, watertight cinch cuffs prevent water from sneaking its way inside the jacket while casting or releasing a fish.

Our aim is to ensure our gear never inhibits performance, so the shell jacket also utilizes optimized Range of Motion (ROM) fit allowing you to cast freely and comfortably. Feature rich indeed, the Aesis 3-in-1 includes large capacity pockets and a removable magnetic catch for shifting between gear packs and eliminating the need for pesky foam patches. Low profile D-rings are strategically placed for accessory attachment and zippered chest pockets keep valuables safely tucked away.

The inner jacket can be zipped inside the outer shell or worn as a separate piece. In the event you work up a sweat, you'll stay warm the inner jacket is constructed with Thinsulate® insulation, which is designed with a moisture resistant barrier to retain insulating value even when damp. High water hand warmer pockets allow you to keep your hands toasty even when the jacket is worn inside waders. Two zippered lower pockets, a chest pocket, and an inner security pocket offer a range of storage options."

# Aesis Hyperdry Down Jacket

**NEW**

For years goose down jackets have been sought after by mountaineering experts due to their lightweight insulating properties and avoided by anglers due to the lack of warmth in moist environments. We merged the best of both worlds by using Allied® HyperDRY pure goose down which utilizes a nanotechnology to successfully repel water, increase loft, and speed drying time.

By partnering with an industry leader in best practices, the down used in this jacket is 100% traceable, PFOA tested and is Bluesign certified.

Strategically placed V-Tech shell fabric is utilized on the shoulders and arms preventing moisture from transferring from light rain or snow. High water hand warmer pockets allow you to keep your hands toasty even when the jacket is worn inside waders. Two zippered lower pockets, a chest pocket, and inner security pocket offer a range of storage options.

- HyperDry water resistant goose down retains insulating properties even when wet
- Belt catch loop keeps jacket in place while putting on wader
- V-Tech shell fabric on shoulder and arms
- High water hand warmer pockets
- Two lower YKK® zip hand pockets
- YKK® vertical zip chest pocket
- Inner security pocket

## Aesis Soft shell Jacket

**NEW**

The evolution of the soft shell continues with the Hodgman® Aesis Soft Shell Jacket. Your new favorite piece of gear is designed for year-round use with its windproof fleece-lined water-shedding soft shell fabric for use on chilly mornings or cold winter days.

High water hand warmer pockets allow you to keep your hands toasty even when the jacket is worn inside waders. You can even snap the jacket to a belt keep the jacket in place when pulling on waders. Versatility is key, which is why the Aesis Soft Shell Jacket includes two zippered lower hand pockets and a chest zippered pocket, offering a range of storage options.

- Waterproof/windproof fleece lined soft shell fabric
- High water hand warmer pockets
- Two lower YKK® zip hand pockets
- YKK® vertical zip chest pocket
- Belt catch loop keeps jacket in place while putting on wader
- Cinch cuffs
- Back D ring for accessory attachment

\* Measure crotch to floor

\*\* Largest measurement chest, waist or hips.

Measurements refer to body size, not garment dimensions and provide a guide that fits most body styles. Adjustable suspenders and belts allow customization to fit approximately +/- 8 centimeters in width and height.

## MEN'S WADING SHOE SIZE CHART

Although we allow proper room in the boot for the neoprene stocking foot, we recommend you find your regular shoe size in the Traditional Shoe Size section and order the corresponding Hodgman wade shoe in the Recommended Hodgman Wade Shoe section. Typically this is one size up for men and one size down for women. Additionally if you wear a half size typically going up one half size will suffice (For example if you wear size 9.5 then a 10 will typically fit comfortably)

Recommended Hodgman Wading Shoe Size				Traditional Men's Shoe Size			
U S	Euro	UK	CM	U S	Euro	UK	CM
7	40	6	25	6	39	5	24
8	41	7	26	7	40	6	25
