www.penn-fishing.eu

This icon indicates an adjustable (16 different casting settings)magnetic brake is built in to the reel. The magnetic brake system allows you to instantly adjust the braking effect on the spool using the turn dial. Turn clockwise and the brake effect is increased by moving the magnets closer to the spool. Turn anti-clockwise and the magnets move away from the spool reducing braking and speeding up the spool for long range casting. The only current reel in the Penn program with an adjustable magnetic brake is the MAG2 series.

HT-100 is a carbon fiber fabric that's laminated on fiberglass to provide stiffness in large sheets, then cut into strips. The name HT-100 is derived as follows; "HT" stands for High Tech, and the "100" signifies that, during original testing, the equivalent of 100 miles of fishing line was taken against the drag of a reel with no significant change to the drag of washers. Inferior washers would not have lasted 20% of that time.

This icon shows that this spool is suitable for use with Berkley Superlines. The difference between standard spools and Superline spools is that the Superline version is fitted with a rubber gasket in the middle that prevents the Superline from slipping under pressure. These spools are available on the Atlantis and Battle reels.

This icon indicates the reel is designed for use with braid lines. Braided lines, unlike mono, have no stretch resulting in greater direct reel pressures. For that reason not every reel on the market is suitable for use with braided lines. The braid ready icon indicates a Penn reel specifically designed for use with braided lines.

SLS3 construction uses inner and outer spiral wrap layers of carbon fiber to sandwich middle layers of alternating longitudinal carbon and glass. The spiral wraps maintain a round cross section in the blank when under load which helps the blank handle higher loads. The middle layers of unidirectional carbon and glass create the backbone of the rod by utilizing the strength of glass combined with the lightweight of the carbon fiber to deliver a strong, balanced, and thin rod blank.

This indicates switchblade harness lugs are fitted to a conventional reel. These fit flush in the tops of the reel side-plates when not required, but are easily flipped up in to position with the tip of your finger when securing the reel to a shoulder harness. This feature is available on the TRQ 2G and the Squall LD.

Penn Dura-Drag™ was developed in a joint effort between Penn engineers and a leading US Auto Manufacturer supplier, and is based on the same material used in the transmissions of high-performance racing cars. Dura-Drag™ is tough and durable. It endures frequent and heavy use, plus can withstand the high levels of heat generated during big game battles. Dura-Drag™ is pre-treated with a special formula developed by Penn Engineers through extensive testing and research. The combination of new drag material and special formula gives anglers the toughest, smoothest, longest-lasting drag ever developed – a drag so revolutionary it has been trademarked Dura-Drag™.

This icon identifies a reel with the visible sides of the spool clearly marked with line capacity indicator rings. These rings are marked at 1/3, 2/3 and full line capacity. This new feature is only found on newly introduced reels such as the Squall, TRQ 2G, MAG2 and Fathom series.

Penn's Techno-Balanced™ rotor is designed to ensure a very smooth retrieve. Except for the TRQ spinning reel, all the spinning reels in the program have this feature.

A Live Spindle is a unique feature! Both the spool and spindle rotate independently from the drive train and frame. This minimizes friction as the spool revolves during free spool, plus eliminates binding during heavy retrieve. This high performance feature is found on some of our new reels like the MAG2, TRQ2G, Squall LD and the Fathom SD.

The Ultimate Adjustable Clicker is only available on the International V series and provides the widest range of bait clicker settings ever, just by turning the knob.

Sealed from heavy seas and spray, protecting key internal parts.

This feature eliminates any accidental changes to the drag settings. You simply set the drag in the chosen position, then turn the button on the drag handle to secure that setting. This feature is found on the Internationals and TRQ reels.

The Versa-Drag™ is a patented drag system with HT-100 washers. This allows the angler to pre-determine a targeted drag range by rearranging the sequence of keyed metal washers and tabbed friction washers. The Penn Versa-Drag™ provides a tremendous drag range regardless of what line-class and drag settings you are fishing. You can see below what each setting does. This great feature is unique to Penn and available on the TRQ LD, TRQ SD, Fathom, Squall SD, and GS Performance reels.

When you see this icon, the body of the conventional or spinning reel incorporates a metal body, and in the case of conventional reels also metal side plates. This ensures precise gear alignment under heavy retrieve loads.

The Quick Shift™ system is a specially designed 2-speed system that switches easily into high or low gear. This feature is available on the 2-speed version of the Internationals, GS Performance and the Graph Lite LD.

Gear box and drag system are sealed to keep out water and other elements

The Infinite Anti Reverse icon stands for the elimination of back play on the rotor when instantly setting the hook. This effect is created by adding a one way bearing in the reel. All of Penn's spinning reels are delivered with IAR, as are most of the conventional reels.

Versa handle system allows the angler to choose how long the handle should be in less than a minute, tools are included with each reel

Extreme range, endless adjustment, and a large diameter drag knob so you can easily crank down to max drag

This icon, displayed on the packaging or website, indicates a reel with perfect oscillation to give an extremely even line lay. This icon relates to the Spinfisher, Atlantis and Slammer reel series.

Gear box and drag system are fully sealed to protect water intrusion

The Live Liner® system was built for fishing livebait. Simply pull the switch back and the front drag disengages and runs off the rear drag.

Rigid Resin 30 - built with 30% carbon fiber our new Rigid Resin material is the perfect combination of strength and weight. Rigid like a metal....light as carbon fiber.

The CNC Gear™ is machined from premium metals which provide a durable yet smooth gear train created by the precision of CNC technology.

REELS

International V - VSX

The legendary International boosted by a drag system with twice the power! Great for Stand-up/trolling

" The Penn International VSX series reels have almost double the drag power of the V and VS models! Designed to cope with the rigours of modern braid angling, it is now possible to use 50 or even 80lb braid on a 30lb reel! Low diameter braid means a smaller capacity reel can be used provided the drag is strong enough to cope with the increased resistance of braid. Penn VSX reels are the first choice for many skippers looking for compact lighter reels to partner with braided mainlines finished with 100m of nylon. "

Alban Choinier

- Body machined from a single aluminium block and anodised against corrosion
- Powerful yet smooth carbon Dura Drag system

International V - VS

A distillation of technology and ruggedness, the International VS is the perfect tool for tackling the hardest fighting fish.

" Legendary. There are no other words that can describe what this reel means to me. It has left an indelible mark on the world of big game angling! The vast majority of trophy fish I have caught either stood up or in a chair have been with this reel. From tiger shark and marlin to giant bluefin tuna. This reel has never let me down even during the toughest of fights! "

Patrick Sebile

International V - VW Single speed

These single speed reels have almost identical retrieve rates to their 2-speed cousins, plus retain many of the same proven build features including a one-piece, gold anodized reel frame and side-plates, tough gears, a drag system again fitted with super smooth drag washers, plus a Push-to-Turn preset knob that eliminates any chance of drag creep when trolling. Professional skippers and crew hold these reels in high regard for their overall durability, reliability, and ease of use when in mid battle with giant fish.

- Full metal body and sideplates keep precise gear alignment under heavy loads
- Dura-drag washers virtually eliminate hesitation, even under extreme drag settings
- Four ball bearings for smooth performance in salt water
- Push-To-Turn™ preset knob eliminates accidental changes to the drag
- Ultimate adjustable clicker available on 12 size only

Squall Lever Drag 2 Speed

Graphite reel balancing great performance with reduced weight and incredible value for money!

"Benefitting from the same great design as the International V series, the Squall Lever Drag 2 Speed reel has a graphite body which results in a low weight reel that is fantastic value for money! Great features include the powerful and smooth Dura Drag system, 5 stainless steel bearings and the Quick Shift 2 speed system."

Special Senator

The Special Senators feature a higher gear ratio and faster retrieve than standard Senators, but all have a powerful, multi-disc drag system, two stainless steel ball bearings, a manganese-bronze main gear and a precision-machined stainless steel pinion gear. These reels have accounted for more record fish than any other reel over the years, and remain one of the toughest and most durable economically priced reels. Available in sizes 113L2, 114L2, 115L2 and 116L to cover a wide variety of fishing situations throughout the world.

- Machined and anodized aluminum spool
- High-strength marine grade bronze alloy main gear
- HT-100™ drag washers provide smooth drag under heavy loads
- 2 Shielded stainless steel ball bearings
- Convertible power handle
- Precision-machined stainless steel pinion gear
- Stainless steel frame rings enhances rigidity to prevent "frame-flex"
- Multi-disc star drag system for smooth and consistent drag
- Stainless steel reel stand
- Heavy-duty clicker

Fathom Lever Drag 2 Speed

Pulls back 1m of line per handle turn on fast retrieves and a powerhouse when winching back slowly. The Fathom drag does it all with ease!

" Power or speed- the choice is yours! This light multiplier is a versatile and reliable reel. You can instantly swap retrieve speed between a fast retrieve or a slow power winching setting that will never let you down. Equally at home chasing fast open water species or working baits over snaggy bottoms. "

Patrick Sebile

- Aluminium frame and sideplates
- Micrometric lever drag system
- Handle turned from forged aluminium
- Double anti-reverse
- Quick Shift 2 speed system to change from a fast to a slow retrieve
- Closed body and harness clip on the size 60 model

Fathom Level Wind

A reel series designed for general fishing and incorporating a stainless steel level-wind system that automatically lays the line evenly on the spool. They offer a gear ratio of 4.3:1 to really pressurise big fish, but have a die cast metal reel frame and side-plates, a forged aluminum spool, plus bronze main and pinion gears, all combining to give total strength and lifting power. These reels also feature a proven HT-100 drag system, four strategically positioned stainless steel ball-bearings to smooth the retrieve and spread overall load. Though ultimately tough, the Fathom is also light in weight and compact in size.

- Full metal body and sideplates
- Marine grade bronze alloy main gear
- Versa Drag™ system with HT-100 washers
- 3+1 Stainless steel bearing system

Warfare

NEW

The PENN Warfare was engineered to be an extremely versatile all-around reel at an affordable price. It features a lightweight graphite frame and sideplates with aluminum frame rings for improved rigidity to prevent frame-flex. HT-100 drag washers provide smooth drag under heavy loads. Line Capacity Rings eliminate the question of how much line you have left when fighting a fish.

- HT-100 carbon fiber drag washers
- Lightweight graphite frame and sideplates
- Right and left hand wind versions
- Available with level wind (LW)
- Micrometric star drag
- Forged and machined aluminum spool
- Machined brass main and pinion gear
- Instant Anti-Reverse bearing
- Line Capacity Rings

Slammer III

The PENN Slammer III is back by popular demand. Built for heavy-duty fishing from either boat or shore, and trusted by charter captains all over the world. The Slammer III reels feature our new IP67 Sealed System which keeps water out of the gear box and drag system. We're also using our updated Slammer Drag System which now utilizes our proprietary Dura-Drag material.

- Full Metal Body, sideplate, and rotor
- CNC Gear® technology
- IPX6 Sealed body and spool design
- Sealed Slammer® drag system with Dura-Drag®
- 6+1 stainless steel bearing system

PENN

Clash

The PENN® Clash® features everything one would expect from a legendary fishing tackle manufacture such as PENN. Starting from the inside out, the gear train runs off our Dura-Gear technology which offers a more durable and long lasting gear. 9 sealed bearings keep everything in line and moving freely while an Full Metal Body eliminates twist caused by high drag pressure. Other features include a thick aluminum bail wire, slow oscillation system for superb line management, Line Capacity Rings, and a braid ready spool.

- CNC gear technology: for incredibly smooth rotation
- Waterproof multi-disk HT-100 carbon drag system
- Infinite anti-reverse
- Techno-Balanced™ rotor
- Aluminium body

Conflict

The Conflict spinning reel is lightweight, smooth, and sleek. The Conflict is designed for the technical angler who is looking for a step up in performance when compared to the Battle. Suitable for all kind of saltwater fishing, inshore, deep sea and spinning, but also for freshwater spinning, carp and catfish.

- Aluminum body and sideplate
- 7+1 bearing system
- Heavy-duty aluminum bail wire
- Superline spool
- Techno.balanced™ rotor for smooth retrieving
- High strength carbon infused rotor (1000 - 4000 sizes)
- HT-100 carbon fiber drag washers
- Line capacity rings
- Infinite anti-reverse

Spinfisher V

Fitted with an incredibly powerful drag system. These reels were created for playing big fish!

" Spinfisher reels are classics for all tropical fishing situations thanks to their extraordinary reliability and solid construction. I started fishing off the African coast in 1998 with a Spinfisher and one has been in my suitcase on every trip since. The reel design has evolved over the years to feature double oscillation line lay - perfect for braid- and Water Tight toric joints for even better waterproofing. But they have kept the classic features that make these reels so special. Shielded construction and a drag housed below the spool delivering unbelievably smooth power every time you hook a fish! From tarpon to tuna, sharks or marlin... I have lost count of the fish over 100kg I have landed with my Spinfisher and the drag is still as good as the day I bought it! No reel other than a Spinfisher is capable of such reliable performance! "

Spinfisher V LC

The Spinfisher series is already for more than 50 years the ultimate workhorse in the PENN range. In 2012 we have launched the new Spinfisher V series, stronger, smoother, a perfect drag system and fully sealed. For the first time Penn introduces the Spinfisher V Liveline and the biggest reel ever, a size 10500 for extreme line capacity. The HT-100 Slammer Drag is very smooth and provides more pressure than before. Spinfisher V, stronger than ever.

- Full Metal Body
- HT-100 sealed drag system
- Solid oversized aluminum bail wire
- Including deep mono spool + shallow braid spool
- Water tight design
- Corrosion resistance construction
- Slow oscillation
- Line capacity rings
- Rotor brake system
- 5+1 Ball bearings

Battle II

With the same full metal body and drag system you trust, the NEW BattleII has been engineered to cast further, achieve higher drag pressure and resist corrosion better than ever before . For a perfectly balanced combination we recommend the use of the Battle II with one of our Regiment rods.

- Full metal body
- Oversized solid bail arm
- HT-100 Sealed drag system
- Line capacity rings
- E-coating corrosion resistance design
- 5+1 Sealed ball bearings
- Techno balanced rotor
- Superline spool

Battle II Longcast

The PENN® Battle II Longcast series offers attractive cosmetics, durable design, and silky smooth HT-100 drag as just a few of the many reasons why so many anglers fish this reel. The Full Metal Body construction allows it to maintain precision gear alignment under severe punishment. The Longcast spool and the slow oscillation system provides great linelay and casting distances.

1378282

1378284

- HT-100 Versa Drag system
- Techno-Balanced™ rotor gives smooth retrieves
- 5+1 shielded stainless steel ball bearings
- Instant Anti-Reverse bearing
- Heavy-duty aluminum bail wire
- Superline Spool
- Line Capacity Rings
- Including braid spool / Rotor brake
- Liveline function
- Slow oscillation

Fierce II

The PENN® Fierce II® offers dependability and unparalleled power at an affordable price. Its field-proven oiled-felt drag system is extremely reliable and has the muscle to tame fish. Featuring a Full Metal Body, stainless steel main shaft, thick aluminum bail wire, and braid ready spool the Fierce II was engineered to provide unwavering performance in the roughest conditions.

- Aluminium body
- Graphite rotor
- Infi nite anti-reverse - on/off on the 2000 version
- Stainless steel shaft

Sargus II

For lure or bait fishing in freshwater or the sea - you will never be let down by the drag or the build of this rugged reel!

" This is a great saltwater reel for targeting fish up to 10kg. I love the high speed ratio on the reel - the 4000 model will winch back an impressive 92.5cm of line per turn! Perfect for all fish that respond to fast moving lures like tuna and amberjack. Match the reel with a quality 15-50gr rod such as the Squadron Labrax (2.4m, 20-50gr) for an unbeatable combo! "

- Techno-Balanced rotor
- Infi nite anti-reverse
- Aluminium body

Pursuit II

The Pursuit II is an upgrade of the successful Pursuit spinning reel. This new series has been given true PENN cosmetics, an improved handle knob, and an updated spool with line capacity rings. High value for money and very versatile, from spinning to deep sea fishing and from saltwater fishing to freshwater fishing.

- Graphite body
- Infinite anti-reverse
- Aluminium spool

Affinity™ II 2017

The all new PENN® Affinity II Black reel features a strong but lightweight graphite frame with graphite side-plates, a forged and machined Long-stroke aluminium spool with line capacity rings, 6+1 stainless steel shielded ball-bearings for smoothness under heavy retrieve pressure, a powerful but smooth HT-100 carbon fibre drag system, rotor brake, and a manual bail-arm. Built in slow oscillation gives incredible line-lay over the spool for ultra long-range casting performance with both braid and mono lines, plus the reel offers two line clips, and is saltwater resistant to minimise long term corrosion. Ideal for all long distance carp angling.

- Lightweight graphite frame and sideplates
- Forged and machined Longstroke aluminum spool
- HT-100® carbon fiber drag washers
- 6+1 shielded stainless steel ball bearings
- Line Capacity Rings
- Two line clips
- Manual bailarm; Slow Oscillation; Rotor Brake
- Saltwater Resistant
- Machined One Touch screw in handle; Including wooden handleknob
- Liveline version available in size 8000

Surfblaster II 2017

NEW

The all new PENN® Surfblaster II reel features a strong but lightweight graphite frame with graphite side-plates, a forged and machined Long-stroke aluminium spool with line capacity rings, 5+1 stainless steel shielded ball-bearings for smoothness under heavy retrieve pressure, a powerful but smooth HT-100 carbon fibre drag system, rotor brake, and a manual bale-arm. Built in slow oscillation gives incredible line-lay over the spool for ultra long-range casting performance with both braid and mono lines, plus the reel offers two line clips, and is saltwater resistant to minimise long term corrosion. Ideal for all surf-casting situations over clean and mixed rough ground.

- Lightweight graphite frame and sideplates
- Forged and machined Longstroke aluminum spool
- HT-100® carbon fiber drag washers
- 5+1 shielded stainless steel ball bearings
- Line Capacity Rings
- Two line clips
- Manual bailarm; Slow Oscillation; Rotor Brake
- Saltwater Resistant

RODS

International V Tuna Trolling

The International V-Series IGFA rods were created for the most demanding and discriminating big game anglers looking to catch world record fish or win big game tournaments. These rods feature more traditional parabolic tapers and configurations for maximum leverage when used in conjunction with a quality fighting chair.

- Tubular glass blank
- AFTCO roller guides
- Canne Stand Up
- Integrated Stuart aluminium butt section

International V IGFA Trolling

Specifically designed for maximum leverage when fighting giant fish from a fighting chair, and using one-piece, hollow, E-glass blanks with a traditional parabolic action, these powerful Penn International V-series IGFA big game rods cover all line classes and feature AFTCO roller guides (selected models), a Stuart aluminum butt section, EVA fore grips, and an aluminum gimbal. Super strong rods for super strong fish!

- Tubular glass blank
- AFTCO roller guides
- Top quality EVA fore grip
- Removable Stuart aluminium butt section
- 1151154 and 1151156 : Stuart bent butt and AFTCO Big Foot ring
- Black leather rod sleeve
- Rod for fighting chair

International V Stand Up

Utilising short, fast taper, one-piece blanks, the Penn International V-Series Standup Rods offer anglers opting to fight standup-style greater mechanical advantages by reducing leverage than the longer, parabolic rods needed for fighting fish sat in the fighting chair. Designed with a soft-tip section that quickly feeds into a powerful mid and butt section, these rods give you an easy, comfortable, but powerful fighting action, along with the handling power when big fish fight vertically deep down below the boat. Fitted either with AFTCO roller guides or Pac Bay turbo guides, also EVA fore grips, a Stuart aluminum butt section and aluminum gimbal.

- Hollow Glass Construction
- Roller Guides
- High Grade EVA fighting fore grip
- Aluminium Butt Handle

Tuna Stick Trolling

With battles against giant tuna in mind, these rods feature a one-piece, tubular glass blank with a solid tip and EVA fore grip to apply maximum pressure. The rods are fitted with AFTCO roller guides that provide minimum line passage friction to make gaining line under load as smooth and easy as possible. And for maximum strength a Stuart aluminium reel seat and butt section, with aluminum gimbal and cover designed to minimize corrosion, complete the specification.

- Tubular glass blank
- AFTCO roller guides
- Stand Up Rod
- Integrated Stuart aluminium butt section

Senator Trolling

Borrowed from a legendary Penn namesake, Penn Senator rods were designed to be as durable and rugged as the reels they are intended to match. Built on one-piece tubular glass blanks with a solid tip, they carry chrome intermediate guides and AFTCO Roller Stripper and Roller Tip rings, a machined aluminum reel seat, EVA fore grip, slick butt, and an aluminum gimbal with protective cover. Senator rods are an economically priced version of the full roller guided rods.

RAMPAGE II series

Featuring progressively fast taper actions with exceptional bite detection, and constructed from a special blend of 24-ton carbon, the new Rampage rods are designed to be light in weight, slim in diameter, but deliver maximum casting and fishing performance. Fitted with Fuji rings and a heavy duty but lightweight reel seat, these rods are also supplied in a tough protective carry tube.

Rampage II Surf

ACCESSORIES

Pliers

PENN® Parallel Pliers provide toughness in an ergonomic and corrosion resistant package. A stainless steel body and jaws coated in black Nickel Titanium create the foundation for our parallel design that keep the jaws parallel along the entire length of the jaws throughout their range of movement, for greater and more even pressure throughout the jaws

- Stainless steel construction
- Black Nickel Titanium coating
- Bypass cutters for both mono and braided lines
- Knot cinching feature
- Crimping feature
- Ergonomic non slip grips

Flotation Suit

New and improved floatation suit, more comfortable to wear and according to the newest specifications.

Jacket: Four front pockets that can be closed with Velcro. A heavy duty adjustable. waist belt. One extra waterproof pocket. Reflective tape on the sleeves Adjustable inner and outer cuffs. Inner cuff is made out of neoprene for a watertight design. The neoprene closes around the wrist. One inner pocket. The jacket is lined with fleece and keep you warm until -5 Celsius. Including crutch to prevent you loosing the jacket over your head when you fall in the water. Removable and adjustable fleece lined hood.

Brace: Two deep pockets in the front with zippers and a flap, reflective tape and reinforced knees and butt. Lower part of the trousers contain heavy duty zippers and Velcro for a perfect fit.

For longlasting performance we recommend to rinse the suit after usage.

- ISO 12405/6 certificate
- Minimum buoyancy 50N
- 100% PVC coating and lining
- Including buoyancy foam
- Hi Vis reflective tape
- Comfortable to wear
- EN 343 approved
- Marine grade whistle
- Delivered in carrybag
