Browning Poles – nobody does it better!

Browning is at the forefront of pole design. Our design team combines high levels of expertise in carbon manufacturing with practical "real world" experience of what anglers actually need from a pole. All Browning pole models are extensively tested "on the bank" before release onto the market so are proven and reliable products.

All Browning poles incorporate a host of "common sense" features that make pole buying, setup and ownership easy.

Browning poles share mandrels, therefore have a high level of section compatibility across the ranges and models. Future upgrades are convenient and easy.

SPHERE ZERG-G

Sphere Zero-G poles are the pinnacle of pole design and construction. Like Browning's Sphere rods, they represent the very best product we can achieve using the carbon technology currently available. Every aspect of a Sphere pole has been optimized – from the specially designed topkits to the ergonomic butt sections. These are specialist poles designed or skilled pole anglers who have the experience to use its ultra high performance to give them competitive advantage.

Xitan Advance poles are flagship products in the Browning range. These are professional standard poles for anglers looking top performance, top quality and total reliability. All Xitan poles are deliberately designed to be long lasting and stronger than the typical "top-end" pole. They can be used with confidence for all forms of fishing. They share a number of innovative and advanced features that are unique to Browning poles which make owning and fishing with a Xitan pure pleasure.

Our exciting ²eX-S mid-range poles share the same advanced features found on our Xitan poles – but at prices to suit all budgets. These are strong and durable "all-rounders" that will give many years of reliable service. No other pole range offers such levels of performance, quality and features at these prices.

SILVERLITE

Our Silverlite poles are purpose designed for situations where ultimate performance is more important than ultimate strength. These are ultra stiff, light weight and "fast" poles. They are aimed at experienced anglers who are willing to accept some compromise on the pole's strength in return for lighter weight and increased stiffness. They have a range of advanced features specifically designed for "silverfish" angling.

BLACK Magilie

The Black Magic name has always been synonymous with strength and durability, and the poles bearing this famous name continue this tradition. Poles in the Black Magic range are built alongside and to the same quality high standards as our Xitan and 2eX-S poles. These are not the typical low-cost poles – they are pure magic!

Spares Service

Browning keeps large stock of spare parts for all current and many discontinued poles. We aim to keep prices reasonable and can offer a rapid delivery service. We operate a consumer helpline (poles@zebco-europe.com). Enquiries are answered by our service team and sales are directed to the consumer's nearest Browning stockist.

Single Length Kits – no cutting back, no bushes, just add elastic and you're fishing!

Single Length Kits – no cutting back, no bushes, just add elastic and you're fishing! All Xitan SLK topkits are the same length and are pre-fitted with top-quality PTFE bushes, so no more cutting or lost pole length. We offer 4 types of SLK (Standard, Extra Power, Short and Long) with different tip diameters to suit different sizes of elastic. There are also matching length cupping kits with screw attachments fitted. At last, no need to take a saw to your new pole.

Pole Protection System – protect sections from damage

Pole Protectors are purpose designed short butt sections. Each of the Protectors is designed as an integral part of the pole and has built-in skid bungs. There are purpose designed Protectors for each pole range and they fit every section from the 5th through to the 16m butt sections. They protect the main sections (particularly useful on thin walled middle sections) and give useful length options.

Nano-Carbon Construction – strong and light, but not brittle

The high-modulus carbon needed to make a pole light and stiff can often be brittle. The pole is strong but a "knock" against something hard or dropping a section can result in breakage. We use Nano-carbon fibres, which makes the sections much more durable!

At last - no cutting back

Xitan poles do not need any cutting back for even the largest elastics so no waste or lost length.

Overwrapped Joints - designing out wear

The top-end Xitans have carbon overwrapped male and female joints to resist premature wear and chipping. The overwrap on the female joints also increases hoop strength which helps unshipping when the pole is under load.

Section Alignment Points – for maximum stiffness

All sections have alignment arrows for maximum rigidity. Sections are also numbered for identification and carry a part number so if you need to order a replacement you will always get the correct section.

Strengthened Stress Points – designing out weak spots

Xitans have visibly strengthened grip areas on the middle sections and also on the elbow areas of the butt sections. These resist crushing when unshipping and cracking when striking. They look good too!

Diamond Surface Finish – smooth and fast shipping

Xitan pole sections have a special diamond ground surface finish for easy "non-stick" shipping in and out. Wet or dry, the Xitans are very "fast" poles to fish with. We also use the minimum of paint to reduce weight and minimise "sticky" areas on butt sections.

Square Pole Protector

Ergonomically shaped Pole Protectors formed by using a carbon process unique to pole making. These sections make fishing at long lengths very comfortable, in addition to protecting the sections from end damage.

Precision Points – accurate feeding is important to success

The butt sections of all Xitan poles have a series of full diameter markings which allow consistent and accurate fishing and feeding when using a pole cup.

Premium Protection Tubes

Xitan poles and SLK topkits are supplied in premium quality protective tubes. These resist both cracking in low temperatures and distortion in high temperatures. Your valuable pole deserves the best protection available.

Tactile Precision Points

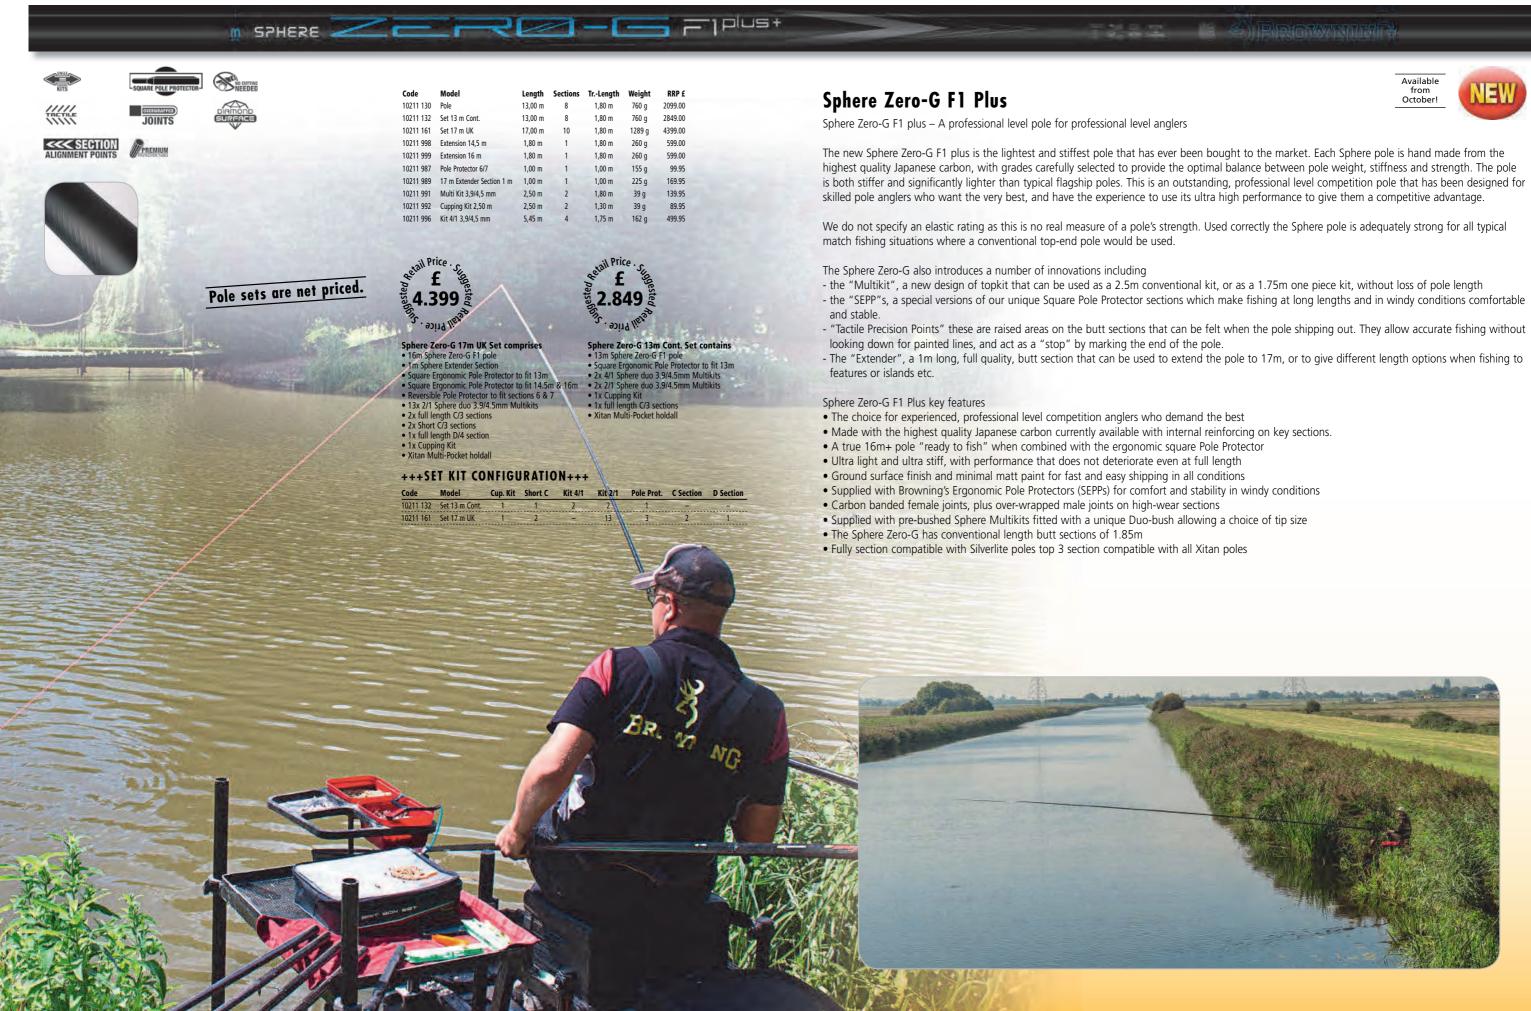

Special raised areas on Sphere butt sections that can be felt when shipping out. Fish accurately an feel the end of the butt sections without looking down!

Browning Trademarks Licensed From Browning.

Pole weight specifications do not include possible extensions such as Pole Protectors or Mini Extensions.

Xitan Z14-1 Advance

Xitan Advance Z14-1 – The longest and strongest flagship pole available

Following in the footsteps of our famous Xitan Z12, the Z14-1 set a new performance standard with its fine balance of rigidity, weight and market leading strength. Constructed using a new type of Silica Reinforced Carbon and resin, the Z14-1 has built a deserved reputation as a totally reliable, strong and durable competition pole – a long lasting pole that will do everything and anything asked of it. The Z14-1 has been designed as a true length 16m pole - without needing mini-extensions, or "cheating" by fitting unusable extra-long topkits, to reach full length. This is the longest pole available on the market, and can be further extended to 18m+. When used with the Xitan, 2m 1 piece topkit the Z14-1 still reaches a true 16m - and is even stiffer and lighter – making it the ultimate commercial carp pole.

Z14-1 Key features

- The first choice for the serious competition angler requiring a true length and ultra reliable, pole
- A true 16m pole "ready to fish" without the need for a mini-extension. The longest pole available!
- Silica reinforced Nano-carbon provides unrivalled balance of weight, rigidity and market leading strength.
- Light and ultra stiff, with perfect balance and response at all lengths. Fishable to lengths of 18m plus
- Supplied with Browning's unique and "elbow friendly" Square Pole Protectors (SQPPs)
- Carbon over-wrapped male & female joints on all sections to strengthen and minimise wear
- Carbon reinforced "grip" areas on lower sections at the most common breakage area
- Supplied with pre-bushed Single Length Kits fitted with a unique Duo-bush allowing a choice of tip size
- Pulla kits fitted with an innovative directional PTFE bush ultra-smooth operation without moving parts.
- 1 piece 2m topkit option available for modern commercial carp styles extra stiff and greater control of fish
- The Xitan Z14-1 has longer length butt sections of 2m to optimise the pole stiffness and length
- Elastic rating 14/20, with a low-cost additional power C/3 section available for more demanding fishing

Xitan Z9-2 Advance

Xitan Advance Z9-2 - A famous name reborn using the latest developments in carbon technology

The totally new Xitan Z9-2 pole has been engineered using the very latest and highest grade carbons available to us. When combined with Browning's long experience of pole design, these "state of the art" materials have allowed us to produce a truly "top-end" pole that is perfectly balanced and remarkably light in weight, but also has the reserves of strength and durability essential for modern pole fishing styles - and for the large fish that are now a part of competition fishing. This is a serious pole for serious match anglers who expect total reliability from their equipment. This pole will not let you down, and will provide top level performance all the way to 17 meters and beyond. The pole incorporates the latest advanced Xitan features Browning's first Z9 pole became a legend ... the Z9-2 will take the pole's reputation to a new level!

Z9-2 Key features

- The first choice for anglers requiring truly "top end", market leading, performance
- Carefully designed to give the optimum balance between weight, strength and rigidity.
- Very light, ultra stiff, with perfect balance and response at all lengths to 17m plus
- Suitable for professional level competition fishing, including match carp fishing
- Supplied with Browning's unique and "elbow friendly" Square Pole Protectors (SQPPs)
- Carbon over-wrapped male & female joints on all sections to strengthen and resist wear • Carbon reinforced "grip" areas on lower sections at the most common breakage area
- Supplied with pre-bushed Single Length Kits fitted with a unique Duo-bush allowing a choice of tip size
- Pulla kits fitted with an innovative directional PTFE bush ultra-smooth operation without moving parts
- The Xitan Z9-2 has conventional length butt sections of 1.85m
- Fully section compatible with current and previous Xitan Power poles
- Elastic rating 14/20, with a low-cost additional power C/3 section available for more demanding fishing

Xitan Z8-2 Advance

Xitan Advance Z8-2 – The ultimate "all-round" pole incorporating our latest innovation & technology

The first generation Xitan Power Z8 was one of Browning's best selling poles with a hard won reputation as a high performing, strong and very reliable "all rounder". This theme has been developed further with the totally new Xitan Advance Z8-2. Careful use of the latest carbon technology has resulted in a pole which is both lighter and stiffer than its predecessor, but without sacrificing any of the strength the Z8 has always been famous for. Remarkably stiff and light, yet tough and very long-lasting, this pole that will do everything that is asked of it – over many years of hard use. The Z8-2 incorporates all of the same advanced features found on the most expensive Xitans and offers unrivalled guality and performance in its price range.

Xitan Z7-2 Power Special

Xitan Advance Z7-2 Power Special – Strength and durability in excess - without excess weight!

Browning's new Xitan Advance Z7-2 has been purpose designed for anglers who need a stronger-than-normal high performance pole, but are only willing to accept minimal extra weight and loss of stiffness. To achieve this the Z7-2 lower and middle sections, which absorb the most pressure when catching big hard fighting fish, have been specially strengthened and reinforced. However, the larger sections and butts still use very high modulus carbon similar to the other Xitan poles. This unique design has had made the Z7-2 much stiffer and lighter than traditional "power" poles. The result is a high performing, very strong, pole without equal in the "power pole" market which is perfect for any situation - lakes or rivers - that needs extra strength.

Z7-2 Key features

NN - Proper 15

- The first choice for anglers needing a top quality and very strong pole, but with minimal extra weight
- Built to the same quality standards as other Xitan poles, but with special carbon reinforcing to add extra strength
- Lighter and stiffer than traditional "power" poles. Well balanced and easily fishable to a genuine 16 metres.
- Suitable for every style of fishing, the most demanding situations, the biggest fish and most difficult conditions.
- Supplied with Browning's unique and "elbow friendly" Square Pole Protectors (SOPPs)
- Carbon over-wrapped male & female joints on all sections to strengthen and minimise wear
- Carbon reinforced "grip" areas on lower sections at the most common breakage area
- Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics without cutting.
- The Xitan Z7-2 has conventional length butt sections of 1.85m
- Pulla kits fitted with an innovative directional PTFE bush ultra-smooth operation without moving parts
- Elastic rating 20+. Fully section compatible with current and previous Xitan Power poles

Xitan Xtreme Margin 9.5 m Revolution

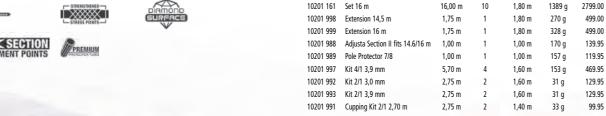

Xitan Xtreme Margin 9.4m - The fully compatible margin pole partner for our Xitan range. Browning's Xitan Xtreme Margin is, as the name suggests, a high quality and very strong pole for margin and "short" fishing. All sections have increased wall strength and visible reinforcing, yet the Xtreme Margin still weighs less than 500gr at 8.5m! - making it probably the lightest margin pole available. Every section of the Xtreme Margin is fully compatible with all current and previous Browning Xitan poles so it is the perfect summer partner other poles in the Xitan range.

6) BROWNING

Xtreme Margin Key features

- The first choice for anglers needing a very strong, but remarkable light, margin or "short" pole
- Fully section compatible, so the perfect partner to other Browning Xitan poles
- Built to the same quality standards as other Xitan poles with special carbon reinforcing to add extra strength
- Supplied with a special Pole Protector section which fits the pole at 7 & 8.5m.
- Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics without cutting.
- Elastic rating 20+. Fully section compatible with current and previous Xitan Power poles

 Silverlite cupping kit pre-fitted with screw con

therefore the latest generation of poles are also heavier than their predecessors. Browning has recognised that not all anglers want or need a "power" pole. Many anglers still mainly target "silverfish" & F1s, therefore a light weight, ultra stiff and "fast" pole is more suitable and desirable than ultimate strength. Our Silverlite poles have been purpose designed for this type of fishing and are considerably lighter and stiffer than their "power" pole equivalents. They share many of the advanced features found on our market leading Xitan poles.

However, the Silverlites have some unique features specifically designed for this type of pole:

- Pre-bushed, 2 piece, topkits available with 3mm and 3.9mm tip diameters to suit light solid and medium hollow elastics
- The complete topkit is 2.75m long so correct for light hollow elastics running through both sections. The 2nd sections have reinforced bands so can be drilled to convert to side pulla kits.
- The topkit tip sections are 1.6m long so perfect for use with light solid elastics running through the tip section only, and a convenient length for breaking down at when fishing in very shallow water.
- The top sections are available separately and provide a low cost way of having a range of light elastic grades available and ready for use.
- The poles are supplied with an "Adjusta" Pole Protector section that can easily be cut to length to make the pole exactly 13m long.
- The Silverlite topkits and 3rd section are compatible (including length) with all Browning Xitan poles. The Silverlites are aimed at experienced pole anglers who want the performance benefits of light weight and increased stiffness, but also understand and are willing to accept some compromise on the pole's strength.

- Section 8 Adjusta Pole Protector
- Section 9/10 Adjusta Pole Protector
- 1 additional Uni-C section
- 3x additional 3.9mm tip, pre-bushed topkits
- 2x additional 3.0mm tip, pre-bushed topkits
 Silverlite cupping kit pre-fitted with screw connector

CC Silverlite SL 10-08

Silverlite Competition Poles - for when ultimate performance is more important than ultimate strength. In recent years poles have needed to become increasingly strong to cope with the large fish now commonplace in most lakes and rivers. However, extra strength invariably means extra weight, therefore the latest generation of poles are also heavier than their predecessors. Browning has recognised that not all anglers want or need a "power" pole. Many anglers still mainly target "silverfish" & F1s, therefore a light weight, ultra stiff and "fast" pole is more suitable and desirable than ultimate strength. Our Silverlite poles have been purpose designed for this type of fishing and are considerably lighter and stiffer than their "power" pole equivalents. They share many of the advanced features found on our market leading Xitan poles.

However, the Silverlites have some unique features specifically designed for this type of pole:

- Pre-bushed, 2 piece, topkits available with 3mm and 3.9mm tip diameters to suit light solid and medium hollow elastics
- The complete topkit is 2.75m long so correct for light hollow elastics running through both sections. The 2nd sections have reinforced bands so can be drilled to convert to side pulla kits.
- The topkit tip sections are 1.6m long so perfect for use with light solid elastics running through the tip section only, and a convenient length for breaking down at when fishing in very shallow water.
- The top sections are available separately and provide a low cost way of having a range of light elastic grades available and ready for use.
- The poles are supplied with an "Adjusta" Pole Protector section that can easily be cut to length to make the pole exactly 13m long.
- The Silverlite topkits and 3rd section are compatible (including length) with all Browning Xitan poles. The Silverlites are aimed at experienced pole anglers who want the performance benefits of light weight and increased stiffness, but also understand and are willing to accept some compromise on the pole's strength.

CC Silverlite SL 10-06

Our Silverlite 10-12 and 10-08 poles have been a major success due to their incredible rigidity and balance. Therefore we have extended the range to include a lower cost version so more anglers can enjoy the Silverlite "magic". The 10-06 includes all the advanced Silverlite features and technology. Like the more expensive models, it is stiffer and lighter than typical poles in this price range. A side benefit of the slightly lower carbon grades used for the 10-06 is that the pole is a little stronger than its more expensive brothers, so it's a good choice for anglers needing a little extra strength in a "silverfish" pole - perhaps for catching "F1's", or river fishing with big floats. The Silverlite SL 10-06 is sold at 13m with optional extensions to extend the pole up to 16m.

²eX-S 60#1

Top of the ²eX-S range, the 60#1 is designed to provide optimal balance between pole weight and strength so is perfect for all pole fishing styles – big fish or small. High quality carbon ensures the pole is light, stiff and strong all the way to 16 metres. The 60#1 has been benchmarked and compares favourably with many poles of twice the price. Built alongside, and to the same high quality standards, as our top-end Xitan poles. Visibly reinforced at all section stress points, with overwrapped joint areas to resist wear, guaranteeing both strength and long life. ²eX-S poles are "ready to fish" with prebushed topkits, so no cutting back and lost length - just add elastic and go fishing! Elastic rating 16. Supplied with our revolutionary Square Pole Protector section for easy and comfortable fishing at long lengths - no more "elbow pain"!

²eX-S 50#1

Top performance and value at this popular price point. A careful mix of carbon grades has allowed us to keep the cost down, but very little has been sacrificed in keeping the pole light and stiff when compared to much more expensive poles, especially at lengths less than 16m. The ²eX-S 50#1 will meet the majority of "serious" anglers needs and was a favourite with the test team for the confidence it gave when handling big fish. Built alongside and to the same high quality standards as our top-end Xitan poles. Visibly reinforced at all section stress points, with overwrapped joint areas to resist wear, guaranteeing both strength and long life. ²eX-S poles are "ready to fish" with pre-bushed topkits, so no cutting back and lost length - just add elastic and go fishing! Elastic rating 16. Supplied with our revolutionary Square Pole Protector section for easy and comfortable fishing at long lengths - no more "elbow pain"!

	Ca+ 1 / E m		Α	1	1	1	

²eX-S 40#1

The perfect "allrounder" for anglers who mainly fish at 13m or less, but still easy to use at 14.5m, especially with our amazing square protector section fitted! The ²eX-S 40#1 provides levels of performance and quality never offered before at this price level. It has most of the same advanced features found on our most expensive poles – this really is a "topend" pole at a "mid-range" price. Built alongside and to the same high quality standards as our top-end Xitan poles. Visibly reinforced at all section stress points and with thickened joints to resist wear, guaranteeing both strength and long life. ²eX-S poles are "ready to fish" with pre-bushed topkits, so no cutting back and lost length - just add elastic and go fishing! Elastic rating 16+. Supplied with our revolutionary Square Pole Protector section for easy and comfortable fishing at long lengths - no more "elbow pain"!

²eX-S 30#1

An excellent value, very strong and reliable pole with many of the same advanced features found on the most expensive Browning poles. Will comfortably handle any type of pole fishing, for any type of fish - big or small. The ²eX-S 30#1 is a tough pole that will withstand hard use, with the added benefit of low-cost spares and accessories that will keep long term ownership cheap. Built alongside and to the same high quality standards as our top-end Xitan poles. Visibly reinforced at all section stress points and with thickened joints to resist wear, guaranteeing both strength and long life. ²eX-S poles are "ready to fish" with pre-bushed topkits, so no cutting back and lost length - just add elastic and go fishing! ²eX-S Ultra Carp#1

This is the specialist carp pole of Browning's hugely successful ²eX-S range and has been designed for the angler who wants an extra level of strength and durability from their pole. This is a very strong pole that will easily handle large carp and heavy tackle. The Ultracarp uses the same quality carbon as other ²eX-S poles, but the important middle sections have been externally reinforced with an X weave carbon tape. In addition, the most common breakage areas near the section ends have been overwrapped to resist the cracking and breakages caused by gripping the pole too tightly, or contact damage from seatbox legs, rollers etc. Despite its supreme strength, the Ultracarp is lighter and stiffer than typical power poles in this price range. The pole is supplied with pre-bushed, large bore topkits, ready to take the largest elastics without any need for cutting. Elastic rating 20+. Supplied with one of our revolutionary Square Pole Protectors for easy and comfortable fishing – no more elbow pain!

Z)BROWNING

²eX-S Margin#1

The ²eX-S margin pole is 8 metres of pure power and will allow you to fish for those huge margin fish with total confidence that whatever takes your bait your ²eX-Se will not let you down! Like the longer ²eX-S Ultracarp, this is a very strong pole that will easily handle the heaviest tackle. The middle sections are externally reinforced with an X weave carbon tape. In addition, the most common breakage areas near the section ends have been overwrapped to resist the cracking and breakages caused by gripping the pole too tightly, or contact damage from seatbox legs, rollers etc. The pole is fully section compatible with all poles in the Browning ²eX-S and Xitan ranges. Incl. 1x 2/1 Kit 5,5mm. Elastic rating 20+.

Hyper Carp Competition HCC 90

Hypercarp Competition HCC 90 - The ultimate carp competition pole

The new Hypercarp Competition range of poles are specifically designed for anglers who competition fish for large carp with very strong tackle, including French "Carpdrome" styles. The strength of these poles also makes them perfect for catching strong fish like barble from big rivers. The HCC 90 is at the top of the range and is specially designed for the carp match angler who wants the best. The pole is much stiffer and responsive than typical power poles of this type. This rigidity provides a very direct contact with the float, and therefore less missed fish! Perfectly balanced at all

lengths, the HCC90 is a top quality competition pole that performs and feels like a "normal" match pole – but with incredible reserves of strength.

HCC 90

- The first choice for the serious competition anglers targeting larger carp or other hard fighting fish
- A true 13m (and 16m) pole "ready to fish" no cutting back or adjustment needed Highest quality carbon with special internal reinforcing which adds strength but minimal extra weight
- External carbon cross-wrap on all female joints to strengthen the section walls and resist joint damage
- Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics.
- Topkits pre-fitted with a new large sized Browning angled pulla bush to accept 4mm+ elastics. HCC poles are topkit compatible with all Browning Xitan poles, and some other older model poles
- Elastic rating 20+.

Hyper Carp Competition HCC 70

Hypercarp Competition HCC 70 – Top performance and quality from a carp match pole

The new Hypercarp Competition range of poles are specifically designed for anglers who competition fish for large carp with very strong tackle, including French "Carpdrome" styles. The strength of these poles also makes them perfect for catching strong fish like barble from big rivers.

The HCC 70 offers the same build quality and advanced features found on the range topping HCC90 pole, but at a lower price to suit more budgets. The 70 uses slightly different grades of carbon, but careful design means that it still delivers very impressive response and balance for a power pole of this type, especially at the popular 11.5m length. The revised carbon grades also means the HCC70 is slightly stronger that the 90 model, so it is also good choice for anglers who prioritise power and strength over the pole's weight.

HCC70 Kev features

- A perfect choice for competition angler targeting larger carp or other hard fighting fish
- A true 11.5 or 13m pole "ready to fish" no cutting back or adjustment needed

Hyper Carp HC 60-130

SPECIALIST EXTREME CARP POLE

Hypercarp HC60–130 - Hypercarp poles are extreme poles for extreme situations! All poles in the Hypercarp range are specialist poles specifically designed for catching the largest carp on the strongest tackle. These pole take over where normal "power poles" are found to be too weak. They are constructed using high quality carbon – essential to keep the pole stiff – however the section walls and joint areas have been significantly thickened and strengthened to eliminate weakspots. The Hypercarps are slightly heavier than conventional poles, but are well balanced to easily useable at full length. Whatever size of fish – a Hypercarp will not let you down!The HC60–130 is top of the Hypercarp range and is remarkably light and stiff for a pole with so much power and strength. Perfect balance means that the pole retains it responsiveness and rigidity all the way to 13m and beyond. This is a high performance, top quality pole for specialist fishing – do not confuse with the typical crude and "soft" strong poles.

HC60-130 Key feature

• A pole specifically designed to catch the largest carp on the strongest tackle

HL DID-130

- The pole "ready to fish" with no cutting back needed, extensions available to 14.5m
- Built using high quality carbon to keep the pole stiff and responsive without sacrificing strength
- Increased wall strength and joint thickness on all sections to eliminate potential stress points
- Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics.
- Adapter section available which allows Browning Xitan and HCC topkits to be used
- Elastic rating unlimited Fish size unlimited!

Hyper Carp HC 40-115

Hypercarp HC40–115 - Hypercarp poles are extreme poles for extreme situations! All poles in the Hypercarp range are specialist poles specifically designed for catching the largest carp on the strongest tackle. These pole take over where normal "power poles" are found to be too weak. They are constructed using high quality carbon – essential to keep the pole stiff – however the section walls and joint areas have been significantly thickened and strengthened to eliminate weakspots. The Hypercarps are slightly heavier than conventional poles, but are well balanced to easily useable at full length. Whatever size of fish – a Hypercarp will not let you down!The HC40-115 is he mid point of the Hypercarp range. By carefully balancing the section weights we have been able to keep the HC40 acceptably light and stiff for a pole with so much power and strength. Easily fishable at full length, but absolutely devastating when used shorter for "hit and hold" fishing.

S) BROWNING

HC40-115 Key features

- A pole specifically designed to catch the largest carp on the strongest tackle
- The pole "ready to fish" with no cutting back needed, extensions available to 13m
- Built using high quality carbon to keep the pole stiff and responsive without sacrificing strength
- Increased wall strength and joint thickness on all sections to eliminate potential stress points
 Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics.

Hyper Carp HC 20

Hypercarp HC20-950 - Hypercarp poles are extreme poles for extreme situations!

HC 20-55

All poles in the Hypercarp range are specialist poles specifically designed for catching the largest carp on the strongest tackle. These pole take over where normal "power poles" are found to be too weak. They are constructed using high quality carbon – essential to keep the pole stiff – however the section walls and joint areas have been significantly thickened and strengthened to eliminate weakspots. The Hypercarps are slightly heavier than conventional poles, but are well balanced to easily useable at full length. Whatever size of fish – a Hypercarp will not let you down!

The HC20-950 is the entry point of the Hypercarp range and is perfect for anglers who do not need a longer pole. Has all the same features found on the more expensive HC40 and 60 models and is absolutely devastating when used for short range "hit and hold" when fishing close to snags.

HC20-950 Key features

- A pole specifically designed to catch the largest carp on the strongest tackle
- The pole "ready to fish" with no cutting back needed, extensions available to 13m
- Increased wall strength and joint thickness on all sections to eliminate potential stress points
- Supplied with large bore, pre-bushed, Single Length Kits which accept the heaviest elastics.
- Adapter section available which allows Browning Xitan and HCC topkits to be used
- Elastic rating unlimited Fish size unlimited!

Black Magic® Classic

The return of a true legend amongst poles! Our original Black Magic 1, 2 & 3 put-in poles built an un-rivalled reputation for strength and durability and were the first choice for long line "to-hand" fishing, or for anglers wanting ultimate strength in a pole. Many are still giving excellent service - but are getting a little old! Therefore, and by popular demand, we have re-introduced the famous Black Magic under the "Classic" name for 2016. The new pole is made on the same mandrel as the originals, using the same carbon quality and manufacturing standards.

Code	Model	Length	Sections	TrLength	Weight	RRP £
10002 110	Pole	11,00 m	9	1,52 m	650 g	499.00

Black Magic® II Slimlite

The new Black Magic Slimlite shares the advanced features of the "BM Gold" pole, but at a lower cost. This is a strong, sturdy, but amazingly light pole, suitable for any type of fishing - and any sized fish. The pole is "ready-to-fish" with pre-bushed topkits (so no cutting needed) and is supplied with one of our short Pole Protector mini sections, plus a pole holdall. Available at 9.5 and 11 meters, but can be extended to 13m and longer with an additional extension. Rated for elastics up to 20.

Code	Model	Length	Sections	TrLength	Weight	RRP £

Black Magic® II Gold

The new Black Magic Gold is effectively a "short" top-end pole. It has been specifically designed for anglers who want a top quality, very light, slim and stiff pole - but do not want or need a very "long" pole for their fishing. The Gold is made of top quality carbon and built alongside, and to the same quality standards, as our most expensive Xitan poles. The pole is "ready-to-fish" with pre-bushed topkits (no cutting back needed) and is supplied with one of our short Pole Protector mini sections, plus a full sized holdall.

Black Magic® Margin

A very strong margin pole built in the Black Magic tradition. Very stiff and remarkably light in weight considering its power and strength. Strong enough for any size of pole elastic and any size of fish. Has a very large diameter tip so does not need any cutting back for even the largest elastics so no lost pole length. Pure Black Magic!

Pit Bull

SAROWNING 24+ +

"Ready to go" strong poles – just attach a pole rig and you're ready to fish! Available at 4 & 6 meters, both poles are strong but not too heavy. The 4m Pit Bull is fitted with elastic suitable for 4 to 8lb line and hard-fighting fish like carp and tench. The 6m version includes an extra top-kit with lighter elastic, suitable for smaller fish like perch and bream. Both poles come in a rigid protective carry tube.

Margin Mavler II

Our totally unique "hit 'n hold" margin pole that has gained the reputation as being the strongest margin pole on the market. Any size of fish and any size of elastic – the Mauler will handle it! The Mauler has a parallel middle section which can be added or removed to allow the handle section, which has slip-proof EVA grips, to be used at 2 different lengths. The tip section has a big diameter and needs no cutting back for the strongest elastics on the market.

Code	Model	Length	Sections	TrLength	Weight	RRP £

B34 B35

When you make first-class poles like Browning you should also be able to prove your expertise in terms of Bolo rods. The Silverlight Bolo 10-14 is the flagship: Super-light, fast and stiff, and with a high quality finish throughout – from the reel holder to the whipping and the slide rings of the top two sections which sit on carbon sleeves.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £
1998 600	Silverlite Bolo 10-14	6,00 m	6	30 g	1,40 m	268 g	290.45
1998 700	Silverlite Bolo 10-14	7,00 m	7	30 g	1,40 m	362 g	345.05
1998 800	Silverlite Bolo 10-14	8,00 m	8	30 g	1,40 m	485 g	417.75

Silverlite Bolo 10-08

The affordable sibling of the Silverlight Bolo 10-14: the 10-08 version is a Bolognese rod that has a somewhat more powerful action yet is still incredibly light to hold. Equipped with SIC rings and finished in the latest high modulus carbon fibre. All ring joints are sealed with epoxy resin.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £
1979 600	Silverlite Bolo 10-08	6,00 m	6	30 g	1,45 m	272 g	227.75
1979 700	Silverlite Bolo 10-08	7,00 m	7	30 g	1,45 m	387 g	264.25
1979 800	Silverlite Bolo 10-08	8,00 m	8	30 q	1,45 m	513 q	300.45

Aggressor Bolo

Perhaps the hardest balancing act: The entry-level Bolognese rod must not be too expensive, so high-modulus carbon must be used sparingly yet without the rod becoming too flimsy or even bulky. The Aggressor Bolo B 700 provides an excellent compromise, representing possibly the best Bolo in this price segment ever made.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £
1976 500	Aggressor Bolo	5,00 m	5	2 - 15 g	1,38 m	248 g	99.95
1976 600	Aggressor Bolo	6,00 m	6	2 - 15 g	1,45 m	342 g	118.85
1976 700	Aggressor Bolo	7,00 m	7	2 - 15 g	1,45 m	444 g	145.25
1976 800	Aggressor Rolo	8 00 m	8	2 - 15 a	1 47 m	580 a	163 35

BROWNING

The SPHERE rods are truly from a different world. The rods have been developed using the highest quality carbon available and every other aspect of their design has been engineered to produce a product that is as "perfect" as we can possibly make it.

All SPHERE rods feature:-

- The slimmest, lightest, high-modulus carbon blanks available
- A unique ergonomic and weight reducing handle which transmits more "feel" to the angler. SPHERE rods look and feel like no other rod on the market. We believe that these are the most advanced match style fishing rods available.

The Sphere Match rods, like all rods in the Sphere range, have been developed using the highest quality carbon blank and fittings available. Every aspect of the rods has been carefully engineered to produce a product that is as perfect as possible. The rods are ultra light, ultra slim and are fitted with a unique ergonomic weight reducing handle which transmits more "feel" to the angler. They feature special ultra low friction "skeletal" SIC guides – the best and lightest available. The rods have classic medium-through actions, however the carbon quality and blank design allows these rod to be used for a wide range of float fishing styles - from casting big wagglers on lakes, to fishing small floats at close range. These are the ultimate all-round match rods, and are truly from a "different world"!

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £
1499 390	Sphere Match	3,90 m	3	30 g	1,37 m	149 g	399.95
1499 420	Snhere Match	4 20 m	3	30 a	1 48 m	157 a	429 95

Sphere Pellet Waggler

By popular request, we have extended the Sphere float rod range to include an 11'/3.3m, 2 piece Pellet Waggler rod. This rod is ultra slim and unbelievably light - weighing in at less than 5oz/150gr - which makes the constant casting that is usually need for this technique much less tiring and easier to sustain. The blank has the classic Pellet Waggler parabolic action, but is fast to pick up line due to the inherent stiffness of the ultra high modulus carbon used in its construction. The rod was carefully tested to ensure it has the perfect power for match sized carp. As with all Browning Sphere rods, the Pellet Waggler is finished to the highest standards and features the unique Sphere ergonomic handle.

Code	Model	Length	Sections	C.W.	TrLength	Line Class	Weight	RRP £
12002 330	Sphere Pellet Waggler	3.30 m / 11'	2	25 a	1.68 m	3 - 6+ lbs	134.18 a	399.95

Sphere Hot Rod Silver Edition

A specialist rod carefully designed for catching small silverfish on light tackle, light lines and small hooks. The rod is extremely light in weight and features a very fine solid carbon tip which has been spliced into the rod main blank. This creates a very fast actioned rod, but with a very soft tip which minimizes hook pulls and lost fish. This rod is so sensitive it can be safely used with lines down to 0.07mm. The rod is a product of the successful Browning Hotrods team who are experts at this type of fishing and have used this type of rod with great effect on drains and small rivers in the east of the UK. The rods has been called "Silver Edition" to commemorate Hotrod's 25 year association with the Browning brand.

Code	Model	Length	Sections	C.W.	TrLength	Line Class	Weight	RRP £
12000 345	Hot Rod Silver Edition	3,45 m / 11,6'	2	12 oz / 0 - 5 g	1,79 m	2 lbs	127 g	399.95

B38 B39

In 2010 Browning were amongst the very first to offer new styles of short rod which challenged the need for traditional length rods on commercial fisheries. Our Force 8' Wand and 9' Micro Waggler were big sellers and soon copied. We have refined our designs further to stay "ahead of the game". The result is our range of 13 Commercial King rods. These rods are based around ultra slim and light high modulus full carbon blanks. We have carefully considered every aspect of the rod, not just the action. They are absolutely perfect and look superb! These rods are typically HALF the cost of similar quality rods from other suppliers. We challenge anybody to find an equal performing rod at these prices. The Commercial King range has been further improved and refined.

Commercial King² Wand

Try one of these and you will never use a long rod again! The ultimate rods for close range tip fishing. The 8' length dramatically improves accuracy and lands fish incredibly quickly. Forgiving through actions but power in the butt so can be a real "bagging" rod. The F1 version is around 20% softer and is perfect for winter carp fishing with light lines and small hooks. Both supplied with 3 glass tips (0,5 oz, 1 oz, 1,5 oz).

Commercial King² Bomb

The classic 10′, 2 piece "bomb" rod. A rod that can be used for just about anything – feeder, bomb, method, winter scratching or big summer catches. Powerful enough for carp but forgiving enough for skimmers, light lines and small hooks. Short handle length for ease of use. Supplied with 3 glass tips (1,0 oz, 1,5 oz, 2,0 oz).

Commercial King² Carp Feeder

Classic through actioned rod for fishing at medium range. The 2 piece rod has power in the butt section for casting and landing fish quickly, but retains a softer action in the middle essential to eliminate hook-pulls when playing hard fighting carp at close range. Suitable for feeders to around 40gr, hooklengths to 0.22mm and is supplied with 3 glass tips (1,0 oz, 1,5 oz, 2,0 oz).

B40 B4

Long rods – who needs them? The "must have" for commercial anglers: Short handles and feather light weight make these short rods unbelievably fast and accurate to fish with. They are simply unbeatable for short to medium distances. The 9' rod is deceptively powerful and tames even big fish very quickly. The 10' F1 version is around 20% softer and perfect for smaller floats, lighter lines and smaller hooks. These rods are natural partners for our Wand tip rods.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £	
1879 270	Waggler	2,70 m	2	20 g	1,40 m	160 g	59.95	
1879 300	Waggler F1	3 00 m	2	10 a	1 55 m	170 a	69 95	

Commercial King² Pellet Waggler

2 piece, 11' rods with perfect, parabolic, "non-lock" actions. Shorter than normal handles allow the rods to be moved around quickly for "feed-cast-feed" techniques. The medium rod has a standard action for wagglers to 12gr. The Power version is around 15% stiffer for situations involving bigger floats, bigger fish or bigger weights!

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £

1879 331	Power	3,30 m	2	30 q	1,70 m	205 g	74.95	

Commercial King² Carp Tickler

A revolutionary new rod design that takes "short" commercial rods to the next level. The Tickler rods effectively a one piece 7' rod which is "folded" for carrying by just pulling out the quivertip, placing the hook in a special keeper tube and winding the line tight. Everything is held in place without the need for any rod bands or sleeves. The rods can be set up and "ready to fish" in less than 10 seconds - and put away just as quickly - without the irritating tangles and damaged quivertips always suffered with transporting a made-up conventional 2 piece rod. As the main rod is in one piece and has no joints the action is absolutely perfect. The 7' length further improves casting accuracy compared to even 8's rods, and brings even big fish to you feet and ready to net very quickly. Even if you are already a "short rod convert", just try one of these and you will never go back to your difficult to assemble "long" 8 or 9' rod. Two versions to suit Carp/F1, or summer/winter, fishing.

Commercial King² Quickfish

A totally new design concept which allows a rod to be assembled and "ready to fish" in less than 15 seconds. Completely eliminates the irritating tangles and damaged quivertips suffered when carrying and assembling a conventional 2 or 3 piece rod. Just push in the quivertip, extend the lower telescopic section and you are fishing! The unique mix of a long top section and extending butt section provides a perfect parabolic rod action with absolutely no flatspots. A unique hook storage tube is fitted which protects and prevents the hook snagging the bag and keeps the end tackle tidy. The CK Quickfish rods are available in 2 lengths, a 10'/3m Bomb rod and a 11'/3.3m Carp Feeder rod, both perfect for method feeder techniques. Like all CK rods, they have perfect actions, quality fittings and a stunning finish.

Black Magic® Competition Float

New, beautifully light actioned float rods designed for mixed fishing. Perfect for waggler fishing. This slim and very light rod has a faultless progressive action, which allows even bigger fish to be landed on light lines. The perfect all-rounder for light tackle fishing on rivers and lakes.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP £

Hot Rod Multi Float

The Multiclassic Waggler rods are designed for typical modern styles of fishing which usually involves catching better quality fish. The slim rods have traditional all-through actions with power in the butt section to handle better quality fish and cast bigger floats and offer quality rarely seen at this price range.

Code	Model	Length	Sections	C.W.	TrLength	Weight	RRP f
1087 360	Hot Rod Multi Float	3,60 m	3	10 - 30 g	1,26 m	175 g	62.9
1087 390	Hot Rod Multi Float	3,90 m	3	10 - 30 g	1,36 m	195 g	69.9

Perfect for anglers needing a slightly "stepped-up" feeder rod, this deceptively powerful 12' / 3.6m rod is designed for fishing medium feeders at ranges to around 60m on lakes, rivers or the big continental canals. The slim high-modulus blank has power in the middle and lower sections allowing feeders to be "punched" out with high accuracy. However it retains a forgiving top section for playing fish at close range. Slim, light and good looking with top quality fittings.

Code 12204 360	Model Black Viper II MK12	Length 3,60 m / 12'		C.W. 80 g	TrLength 1,26 m	Weight 276 g	RRP £ 199.95	
Code 12204 360	Model Black Viper II MK12	•	d Feeder Tip 1.0, 1.5 oz	os				

We offer two different versions of the 13' Black Viper rod. The standard MK13 has an average action typical of 13' rods and is perfectly suited to slow-flowing rivers and lakes with typical casting ranges of 30 to 80 metres. The mellow action allows light hooklengths to be used with confidence. The Black Viper MK13 "S" is a fast actioned, more specialist version, which provides the power for casts up to around 100m without sacrificing its fish playing action. The dynamic design of the blank does all the work on the cast - meaning less effort is required from the angler. Long casts can be achieved even by anglers less experienced at long distance casting. Both rods are balanced for their length and feel as good as they look. Top quality fittings throughout.

12204 391	Black Viper II MK13 S	2.0,	3.0, 4.0 oz				

Black Viper II MK14

Like the Black Viper MK13, the 14' version is also available in two types. The standard Black Viper MK14 is the ultimate casting tool. Far, further furthest - you will never be out-distanced! The high-modulus blank is powerful and designed for comfortable casting to distances of 70 to 120 m. Our dynamic blank designs throughout the range eliminate the need for violent, aggressive casts. Accurate casting to over 100m is both realistic and easily achievable with these rods. The Black Viper MK14 "S" version is the ultimate powerhouse, with the same attributes as the standard MK14 rod, but with even more power for when big heavily loaded feeders are needed.

PULL HANDRE							

The SPHERE rods are truly from a different world. The rods have been developed using the highest quality carbon available and every other aspect of their design has been engineered to produce a product that is as "perfect" as we can possibly make it.

All SPHERE rods feature:-

- The slimmest, lightest, high-modulus carbon blanks available
- A unique ergonomic and weight reducing handle which transmits more "feel" to the angler. SPHERE rods look and feel like no other rod on the market. We believe that these are the most advanced match style fishing rods available.

The Sphere Feeder rods, like all rods in the Sphere range, have been developed using the highest quality carbon blank and fittings available. Every aspect of the rods has been carefully engineered to produce a product that is as perfect as possible. The rods are ultra light, ultra slim and are fitted with a unique ergonomic weight reducing handle which transmits more "feel" to the angler. They feature special ultra low friction "skeletal" SIC guides – the best and lightest available. The ultimate feeder rods. The superb quality of the SPHERE blanks has allowed us to produce a small range of rods to cover a wide range of feeder fishing situations. The carbon quality of the blank adds meters to a cast and improves casting accuracy by minimising sideways flex when the rod under load. However, the blanks are responsive enough to safely play soft mouthed fish like skimmers without fear of hook-pulls. Supplied with 4 tips to give both sensitivity for bite indication and durability when casting.

Sphere Bomb

The Sphere bomb rod, like all rods in the Sphere range, has been developed using the highest quality carbon blank and fittings available. Every aspect of the rod has been carefully engineered to produce a product that is as perfect as possible. The rod is ultra light, ultra slim and are fitted with a unique ergonomic weight reducing handle which transmits more "feel" to the angler. They feature special ultra low friction "skeletal" SIC guides – the best and lightest available. A soft actioned rod optimised for fishing at ranges to 30m with bomb, or light method and conventional feeders. The top-quality blank is soft enough to be safely used with light lines and small hooks, but has reserves of power in the butt section to tame bigger and hard fighting fish when necessary. Supplied with 4 glass tips to give both sensitivity for bite indication and durability to withstand the demands of carp fishing.

King Feeder Ultralight/Braid

These rods have been specifically designed for fishing with non-stretch braided lines - which need soft action rods to prevent hooks pulling from fish. The high-carbon blanks retain enough "backbone" for casting feeders, but have a forgiving through-action, which is equally useful for fishing with fine hooklengths for soft mouthed bream. Available in two lengths.

King Feeder Multi-Length

These slim and light rods have classic soft & medium actions for typical medium distance feeder fishing on lakes and slow flowing rivers. The light rod is perfect for skimmers on light tackle. The medium version has more power in the lower sections for longer casting and/or bigger feeders. These are good "do everything" rod for anglers looking for a general purpose feeder rods. Range includes a practical 11'/13' multi-length rod. The base 11' / 3.30m rod is perfect for close to mid range fishing, including for match sized carp. The rod's "medium" action is maintained at both lengths, making it the perfect all-round feeder rod.

King Feeder Distance/River

These are the "stepped up" members of the King Feeder rod family. Still very light and slim, they have medium to heavy actions for when extra power is needed for more powerful rivers or casting heavier feeders longer distances. However, the blank has been carefully designed so that they are still forgiving enough to be used for bream etc. There are two 13' / 3.9m versions for when extra length is needed for longer casts and/or use on wider rivers.

King Feeder Ultra Distance

The "Kings" of long casting. Two powerful 14'/4.2m rods that will cast feeders to the horizon! Both rods are also perfect for very large and powerful rivers where the extra length helps keep the line off the water and helps control hard fighting fish in strong currents. Designed for situations or anglers that need a long and very powerful feeder rod that will cope with the biggest cast with the biggest feeder on the biggest lake or river. The "Big Daddies" of powerful feeder rods!

Excellent feeder rod set with an optimal price-performance ratio. The slimline, weight-saving SIC rings are particularly attractive. They also make the slender blanks with mortise and tenon joints extraordinarily sensitive and sprightly. With Fuji reel holder. Feeder rods in this price segment have never been better. The Distance feeder models are ideally suited to fishing at long range when swimfeeders have to be catapulted over maximum distances.

Black Magic® Competition Carp

A range of three quality carbon rods mainly designed for match-sized carp, but also good for small rivers. The 8' / 2.5m "Picker" makes accurate casting to around 25m easier and fish can be landed very quickly. The classic 10'/3.0m "Bomb" and 11'/3.3m Light Feeder are adaptable rods suitable for the method or conventional feeder fishing for a wide range of fish, winter or summer, due to their forgiving "all-through" actions. These rods are really enjoyable to use as they are so sensitive and light when playing fish. All are supplied with 2 quivertips.

Code	Model	Length	Sections	C.W.	TrLength	Line Class	Weight	RRP £
12200 250	Picker	2,50 m / 8'	2	50 g	1,28 m	3 - 8 lb	207 g	44.95

12200 330	Carp	1	oz, 2oz					

Black Magic® Competition Feeder

These are general purpose, "do anything", carbon feeder rods that will handle every form of feeder fishing. If you only want one rod for all your feeder fishing, rivers and lakes, then choose one of these! Capable of casting larger feeders over good distances, but still soft enough for use at close distances with light lines for smaller fish. The River Feeder version is designed for bigger feeders, bigger fish and, if needed, longer casts so is good if using large method feeders, or on powerful rivers where the rod needs to have some "backbone" and take some abuse! Supplied with 2 quivertips.

Code	Model	Length	Sections	C.W.	TrLength	Line Class	Weight	RRP £

12200 36	River Medium	2	oz, 3oz						

Black Magic® Competition Power

Two longer versions of the BM Power Feeder rod for long casting and/or big rivers. Will comfortably cast big feeders long distances or tame big river fish like barbel. These are tough rods for tough situations! The 14'/4.2m rod is very powerful and designed for extra long distance casting with large feeders or other types of "heavy duty" fishing. Strong and reliable, these rod will handle the most demanding types of fishing. Supplied with 2 strong carbon quivertips to match the rods action.

Backfire Method Mania

Universal feeder rod range particularly suited to Method fishing. Our testers did not want to put the prototypes down. Even the 3.6-metre models achieved casting distances of around 100 m with effortless ease. Besides the excellent casting properties, the rods also impress with their harmonious action that almost eliminates pull-outs during a fight.

Browning have a lot of expertise in producing specialist tackle purpose designed for the long-distance feeder fishing which is common in mainland Europe. The Black Viper MK 850 FD is an example of a specialist reel packed with features specifically for medium to long-range feeder fishing. Sophisticated wormshaft gears have been used to ensure effortless retrieve and perfect line lay - particularly important for long-distance casting and when using braided lines. This is further enhanced by the large, wide and shallow spool design which can be perfectly filled without resorting to lots of backing. In summary, a purpose designed product that will out-perform conventional reels for this style of fishing.

Standard Technical Equipment:

- Electronically balanced lightweight rotor (LWR)
- Large-surface multi-disc front drag system
- CNC stainless steel handle
- Non-twist line roller supported by ball bearings
- Robust worm shaft power gears

Black Viper MK BF

Another member of the Black Viper MK 850 BF family of over-sized reels, with same specialist design, features and wormshaft gearing as the other two reels in the range, but incorporating a run control facility. An alternative to conventional carp-oriented run control reels. Perfect for long-distance fishing with finer lines or braid for species like bream and tench.

Standard Technical Equipment:

- Electronically balanced lightweight rotor (LWR)
- Large-surface multi-disc front drag system
- Finely adjustable run control system
- CNC stainless steel handle
- Non-twist line roller supported by ball bearings
- Robust worm shaft power gears
- Aluminium Long Stroke[™] spool
- Aluminium spare spool
- Wormshaft oscillation system
- Continuous anti-reverse

ately impressed.

Black Magic® Max Distance

Feeder fishing at 100 meters distance? Unthinkable some years ago, now a

standard distance for many pros. However, rather than resorting to a tradi-

tional surf reel, they should really take a closer look at the Black Magic Dis-

tance. Never has there been a more uncompromising feeder reel for extreme

casting distances. Gear ratio, line capacity, spool design, transmission power:

all have been optimized for this precise purpose. Test anglers were immedi-

Groundbait No. 1

The most versatile groundbait in the Champions Choice line. No. 1 can be used as a base mix with all of our other groundbaits. It is suited for very dry use as an explosive feeder mix or watered down for use on lakes and rivers. This mix has been used successfully for years by the Browning Team, which is a testament to its quality. The dark colour comes solely from the use of natural flours. The slightly bitter aroma of this groundbait holds fish in the swim for long periods. Grain size: medium - fine.

Code Contents RRP £ 3970 001 1 kg Supplied as: 6 x 1 kg bags

Groundbait Grand Slam

Brown groundbait for enticing shoals of bream. A sweet groundbait which is both intensively attractive and highly adhesive, making it perfectly suited to mixing with large volumes of bait and/or particles. Grand Slam is particularly successful when used in conjunction with chopped worms and casters. Even large specimen bream are held in the swim for long periods. Grain size: large. Adhesion: strong.

Code Contents RRP £ 3970 015 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Etang

This groundbait is perfectly suited for attracting large fish in lakes and slow running waters. The high percentage of ground hemp seeds and use of high quality flavourings attracts fish over long distances. The addition water allows for maggots, casters or bloodworms to be added. Grain size: fine

Contents RRP £ 3970 004 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Canal

Canal has a distinctly aromatic scent which is irresistible to large roach, bream and silver bream. The groundbait is made from the finest toasted breadcrumbs with roasted flavour and ground hemp. Canal is perfect for use with bloodworm as there are no salty ingredients to damage the bait. This brown coloured groundbait is well suited to all types of running water.

Contents RRP £ 3970 005 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait M7

Legendary Dutch feeder groundbait for use on lakes and rivers. For stillwaters, M7 is soaked an hour before fishing and passed through a medium sized sieve to retain its explosiveness. For rivers, M7 should be soaked the evening before fishing to ensure that it sinks properly without floating particles being carried away. Moisten again slightly before fishing and pass through a medium sized sieve. With M7, even the smallest quantities of groundbait can hold large groups of fish in the swim for long periods. The groundbait is very filling and has a sweet scent and flavour. Grain size: large.

Code Contents RRP £ 3970 002 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait River

A match fishing groundbait with very strong binding properties and long lasting effect, suitable for large whiting. River is perfect for use on large flowing rivers with plenty of boat traffic. This groundbait can be combined with large quantities of particles to keep fish searching throughout your match. Its unique blend of aromas attracts fish quickly and over long distances. Grain size: medium

Code Contents RRP £ 3970 003 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Big Fish

A heavy, bright yellow groundbait for large fish such as bream, tench and carp. The strong binding properties and long lasting effect ensures that large volumes of particles such as casters, worms and gravel can be mixed with the bait. The sweet scent of almond, vanilla and marzipan is irresistible to huge specimens. Big Fish is suitable for use on large rivers and lakes. Grain size: large.

3970 006 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Black Magic®

Groundbait for the most difficult conditions! The very dark, almost black colour makes this groundbait perfect for fishing in clear water. The special colouration makes Black Magic® perfectly suited to the lake or river bed, leading the fish straight to the feeding site and keeping them there. Black Magic® has highly active ingredients which roach especially find irresistible. The selected combination of attractors makes the scent and flavour attractive to all types of silver fish. Grain size: medium.

Code Contents RRP £ 3970 007 1 kg 2.85 Supplied as: 6 x 1 kg bags

B76 B77

Groundbait Gardons

Specifically developed for targeting larger roach on canals and rivers, Gardons has just the right properties to attract and hold specimen fish in your swim and to keep them feeding. With few active ingredients the fish will concentrate directly on the feeding area. The distinctive aroma of ground spices is irressistible to large roach and bream. Grain size: large. Adhesion: medium.

Code Contents RRP £ 3970 011 1 kg Supplied as: 6 x 1 kg bags

Groundbait Red Roach

A roach groundbait without an equal. The rich red colour of the groundbait provides an unbeatable advantage on coloured waters and in spring. Only the best high quality ingredients are used for Red Roach. The distinctive scent of roasted hemp combined with a special mixture of additives is irresistible to large roach and skimmer bream. Red Roach can be used on slow flowing canals and stillwaters and is perfect for use with bloodworm. Grain size: medium. Adhesion: medium.

Code Contents RRP £ 3970 012 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Easy Cheesy

Developed for barbel fishing on large rivers, the distinctive parmesan cheese scent is irresistible to barbel. Easy Cheesy contains large red food particles which are slowly released from the balls of groundbait into the current, attracting fish from large distances. The strong binding properties of the groundbait provide a long lasting effect, holding fish in the feeding area. The groundbait can also carry large quantities of live bait and particles. Grain size: large. Adhesion: very strong.

Code Contents RRP £ 3970 013 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Sweet Breams

A light-coloured groundbait for attracting shoals of specimen bream. Sweet Breams has a unique almond scent which bream simply cannot resist. Principally for use in the summer months the groundbait has good binding properties making it perfectly suited to attracting and holding large shoals on lakes and large rivers. Grain size: large. Adhesion: strong.

Contents RRP £ 3970 014 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Friture

When your aim is to net as many small fish as possible in a limited amount of time, you require a groundbait that is both highly attractive and that has a perfect clouding effect. In addition, the ground bait must not be too filling. "Friture" has been specially designed for these requirements. The angler can determine the consistency by regulating the amount of water added. This makes the groundbait suitable for both rivers (wet mix) and stillwaters (relatively dry mix).

Code Contents RRP £ 3970 060 1 kg 2.85 Supplied as: 6 x 1 kg bags

This unique Tench mixture from the 'Champions Choice' groundbait range, has been specially designed to attract tench, but also holds a magical appeal for huge bream and carp. The binding strength has been formulated to maximise catch rate in lakes and slow flowing rivers. The groundbait receives its dark colouration from the finest fish meal. The fishy aroma with a subtle hint of sweet biscuit attracts large specimens quickly and holds them in the swim for long periods. During test development, our angling consultant managed to land monster tench over 9.5 lb as well as double figure bream. Grain size: medium, Binding strength: medium.

Code Contents RRP £ 3970 020 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait All Seasons

An excellent, versatile groundbait in the Champions-Choice bait range. The intensive aroma of this combination of spices particularly draws roach, bream and silver bream to the swim. The slightly dark colour comes solely from the use of natural feed and spices. These ingredients achieve a successful balance between the needs of winter angling, when the fish are somewhat choosy, and fishing at warmer times of year when they are filling their hungry mouths. A true all-round blend for all types of water. Grain size: medium-fine

Code Contents RRP £ 3970 064 1 kg 2.85 Supplied as: 6 x 1 kg bags

Groundbait Crispy Carp

When it comes to selectively attracting big fish such as carp and bream, and then holding them in the swim for long periods, a very coarse groundbait with plenty of particles is ideal. Crispy Carp binds well and therefore allows large amounts of additional loose feed to be included in the mix. With its light colour and intensive fruity aroma, the groundbait is perfect when large numbers of big fish are expected. As is traditional from Browning, we only use the highest quality ingredients for our Crispy Carp. The special feature is the cornflakes which give the groundbait an unmistakable appearance.

Code Contents RRP £ 3970 040 1 kg 2.85 Supplied as: 6 x 1 kg bags

B78

Grand Competition Groundbait

A groundbait that works equally well in slow currents as it does on stillwaters. The mix is sweet, does not bind too firmly and attracts fish like a magnet. As is traditional from Browning, we only use the highest quality cereals, particles, spices and flavours. To mix the groundbait to the correct consistency, we recommend that it is thoroughly dampened around one hour before using and then passed through a medium-sized riddle. Grain size: medium.

River Competition Groundbait

To ensure groundbait reaches the bottom of rivers with a fast flow or deep water, the mix must be heavy, bind well and not break up on the way to the bottom. It needs to sink quickly and not be swept out of the swim, and also be capable of carrying large quantities of loose feed. These are the exact properties that make our River Competition mix one of the best flowing-water groundbaits on the market. We only use the very best ingredients combined with a sweet mix of flavours and spices. The red particles used give the groundbait that final kick of attraction. Grain: Medium

Method Competition Groundbait

It's essential that a method feeder groundbait binds sufficiently to hold on the method feeder on long casts, remains in the feeder while sinking, but then release quickly on the bottom to create a cloud without any active particles. We've combined all of these properties in our Method Competition groundbait and have used the highest quality ingredients and flavours. With its light and reddish colour, the combination of fish pellets and fish meal, and unique consistency, the groundbait is sure to be immediately effective on even heavily fished waters. Grain: very fine

.82 R

Groundbait B22 Match

The basic groundbait but with extreme attraction. Best used as part of a mix. In clear water include as 10 to 20% of your groundbait mix. In very coloured water the proportion can be increased to more than 50%. The low binding properties, fine grain size and overall low dimensional weight make B22 highly versatile.

Groundbait B22 Gardon

In contrast to the standard B22, this groundbait is designed specifically for targeting roach. The hemp and shredded coconut ingredients particularly appeal to roach. The groundbait has low binding properties which rapidly creates a dark carpet of feed on the bottom. The crushed hemp, unique mix of the individual ingredients and magical aroma combine to create a veritable fish magnet in the swim.

Krazy Sweetner

'Krazy Sweetner' is the ideal solution for sweetening groundbait. Carp, bream, tench and other silver fish love a sweet flavour. Krazy Sweetner is many times sweeter than ordinary sugar and is made from sodium-saccharin (around 300 times sweeter than sugar), NHDC (around 1,500 times sweeter) and purely natural, intensively sweetening plant extracts. In contrast with other sweeteners Krazy Sweetner lacks the customary bitter after taste. Recommended dosage: 1 teaspoon per approx. 1-3 liters of groundbait.

Champion's Choice Power Additive

Attractors in powder form have become indispensable for match angling. These allow groundbait to be quickly adapted to changing water conditions. A new scent on the scene can send fish with closed mouths back into a feeding frenzy. The CC Power Additive range is the result of years of experience of our test anglers, who have worked meticulously on the recipes. Take advantage of their experience and bumper catches are guaranteed.

Hybrid Chewies

Soft Pellets have proven to be a real "killer" bait, and not only for carp as bream, tench and even big roach have developed a real taste for them. Hybrid Chewies are 8 mm in size and come in eight flavour- colour combinations and have been thoroughly tested to be just the right texture and firmness for the hooking or hair rigging. Packed in re-sealable, space saving and stackable boxes of 100g – perfect when the angler wants to have a selection of different baits handy.

Pellet Pump

Gone are the days when it took an eternity for pellets to be ready for use. With the Browning Pellet Pump, it takes literally seconds for floating, hard pellets to be saturated with water and become soft and pliable. Simply put pellets and water in the container, close the lid and expel the air from the container with the pump plunger. Then press the valve on the lid and allow the air back in, the pellets are now ready and the lid can be removed. An indispensable tool for all coarse anglers.

Browning Maxi-Lite Seatboxes – modern, good looking and very practical. Browning's range of seatboxes have been carefully designed to be compact and light in weight, but still provide plenty of space for rigs and tackle. The main frame of the box is more compact and lower in height than similar designs. This makes easier for a wider range of anglers to find a comfortable seating position. The new style cassette footplate design is compact and light in weight, but keeps the box very stable and secure. The Competition seatbox is supplied with a totally new design of adjustable short leg for anglers who mainly fish from platforms. This leg has reduced height adjustment, but keeps the box very low to the ground and is generally more compact than full length legs. Conventional standard height adjustable legs are also available.

The Maxi-Lite Competition Box features::

- Underseat 20mm tray
- 35mm deep, side opening drawer:

8017 107 41 cm 9 cm 28,5 cm 69.95

- 2x 20mm shallow tray for pole winders
- 80mm deep tray
- Tray lid unit
- The new design of multi-adjustable short leg. Additional trays are available.

Xitan X36 Pro Seat Box

A professional level seat box for the serious competition angler. The proven design and outstanding quality makes this box the first choice for anglers needing a completely stable and efficient seatbox solution. Outstanding stability and safety are provided by the 36mm leg system - even when the telescopic legs are full extended. Fully compatible with some other box systems.

- X36 Pro box is supplied with
- underseat 3cm side drawer with dividers
- 2 x 3cm trays, plus additional 3cm attached to frame
- sliding cassette unit with a 6cm/9cm height adjustable tray
- shoulder strap
- additional trays of various sizes and a full matching accessory range available

Code RRP £ 8006 001 599.00

Xitan X25 Stacking Seat Box

A high quality traditional design of seat box providing maximum storage space due to its frameless design. The smooth operating cassette type footplate and 25mm telescopic legs provide a secure and comfortable fishing station, even on very uneven ground. The proven tray design and outstanding quality makes this box both flexible in configuration and a long lasting investment. Fully compatible with some other box systems.

- X25 Standard box is supplied with
- underseat 3cm side drawer with dividers
- 1 x 3cm trays
- 1 x 6cm tray
- deep fixed base unit large enough for multiple reels and other bulky tackle
- shoulder strap
- additional trays of various sizes and a full matching accessory range available

8201 008	42 - 88 cm	1,3 kg	22.95

Flat Bed Pole Roller

A traditional and popular design of flat bed roller. The 2 roller sections provide a wide "target" area and effectively act as 2 rollers if breaking a pole down twice. Good quality, light in weight but very stable due to the roller width and wide angled telescopic legs. Supplied in carry bag.

Code	Width	Height	Weight	RRP £
8201 027	56 cm	50 - 80 cm	1,57 kg	74.9

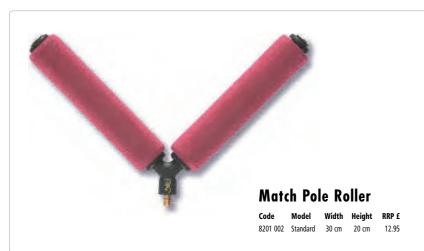

W Pole Roller

A new style of flat bed roller combining the best aspects of flat and V rollers. The unique W shape always moves the pole gently over to the side roller when shipping back. This eliminates the section breaking danger of poles being blown across and out of the flat roller in windy condition. The 2 roller sections provide a wide "target" area and effectively act as 2 rollers if breaking a pole down twice. Has telescopic folding legs and is supplied with carry bag.

Code	Width	Height	Weight	RRP £
8201 026	56 cm	50 - 80 cm	1,57 kg	89.95

Pole Catcher

Small net for protecting pole sections. V-shaped leading edge allows a pole to be placed in from above without rolling out.

Xitan Mega Competition Pole Holdall

Smart rod/pole holdalls. Each has been made slightly oversized, so zips are not strained if used with large tubes, and feature a single large and deep front pocket with long zip that will carry long and bulky accessories. A side quiver allows an umbrella to be carried outside the main holdall. The holdalls have a rubber reinforced base to resist wear. This holdall will actually carry more than 12 tubes. The 12 tube "Mega Holdall" has 2 compartments, both with full zips. It has a huge capacity and is the perfect choice for the angler that likes to carry absolutely everything! Material: 70% Polychlorid, 30% Polyester

Code	Length	Tubes/ Capacity	RRP f

Xi-Dry Fleece Jacket

Triple-layer, high-performance fleece. Wind and showerproof. The jacket has wipeable nylon layers on the sleeves as well as additional layers in the lower front area for keeping groundbait, fish slime, etc. away from the fleece material. The rear section has a lower cut to protect the back when sitting. Material: 100% Polyester
